Thread: [Manipulating my way to number one product on clickbank marketplace?](#)

Studenthhs - February 16, 2013, 1:16 pm

I have a question, and it is how do internet marketers rank their product on clickbank marketplace, for an example in e business "make money online" marketplace on clickbank i sometimes see brand new products that i never before heard of them, and they are only maybe 1 week old and already the best product there is.

their gravity is sky high....and other stats.

Do somebody know how they are doing this?

the only thing i know is that there is some internet marketers that are getting affiliates to promote their product through jv partnership in jv notify pro. But the most odd thing i heard online was that the gravity parameter that ranks and decides which product should be number 1 in the clickbank marketplace is being manipulated.

And through that i draw conclusions that i can also maybe do that-manipulate clickbank gravity for a brand new product. And thats why i am here,i need to know if someone can give me advise and and answer me of it is possible to manipulate clickbank gravity through making multiple clickbank affiliate accounts and after that buy your own product through paypal but, you will manipulate the pricing by doing tamper data changes in other words buying for an example 49\$ product for 1 dollar.

is this possible?

thanks for any answers...?

One answer to all your Questions : NO

Tamper Data is older than the Internet itself. And "manipulate clickbank gravity through making multiple clickbank affiliate accounts" is not possible.

And about the CB products.. The Rule is that the more sales and the fresher your product is than you will get higher in the Best Products List.
