Thread: [\[TUT\] How To Make Any Browser Do The Harlem Shake!](#)

Roger Waters - February 16, 2013, 5:44 pm

Google Chrome:

1. Copy the following code to your clip board (CTRL + C)

Spoiler [\(Click to View\)](#)

Get it from here, HF blocks out some of the code: <http://pastebin.com/L25AqtxW>

2. Press F12.
3. Click on "Console".
4. Paste (CTRL + V) the code into the box.
5. Press Enter.
6. Enjoy.

Any other browser:

1. Copy the following code to your clip board (Ctrl + C)

Spoiler [\(Click to View\)](#)

Get it from here, HF blocks out some of the code: <http://pastebin.com/L25AqtxW>

2. Paste the code into the URL bar.
3. Press Enter.
4. Enjoy.

Note:

This will only make it go for about 30 seconds, the full song and all. Any icons on the screen will move aswell. If you get annoyed by it just refresh the page and it will stop. The more posts or pictures that are on the page, the better it will turn out. This will work on any website. I didn't make this, in case you were wondering. It's all over the web.

PoisonKnife - February 16, 2013, 5:46 pm

I got this error message: "SyntaxError: Unexpected token ILLEGAL"

Working man!!! Very funny, thanks a lot!

FiziDadon - February 23, 2013, 11:29 am

Ive already posted this, in the movie section / including the tutorial
Credits go to me i guess?

Your tutorial doesn't go into much detail and is mostly pictures. I'm not giving credit to you if you didn't come up with it.

Note:

This will only make it go for about 30 seconds, the full song and all. Any icons on the screen will move aswell. If you get annoyed by it just refresh the page and it will stop. The more posts or pictures that are on the page, the better it will turn out. This will work on any website. I didn't make this, in case you were wondering. It's all over the web.

Cool! I tried this trick out and it worked!

Fred Rechid - February 23, 2013, 5:25 pm

WOW This is a good find sir... Thank you for sharing...

Bizzet - February 23, 2013, 5:32 pm

It's pretty awesome.

It's way easier if you just drag the code to your bookmarks though.

Producer - February 23, 2013, 6:06 pm

The pastebin one worked for me, pretty funny lol. Thanks for sharing this.

denyx - February 23, 2013, 9:04 pm

nice this one work for me :D

Thanks Bro Awesome >.<

Deagler - February 23, 2013, 9:12 pm

I absolutely love it! Best "hack" ever.

Processor - February 23, 2013, 9:18 pm

Haha this is very cool ! Thanks for entertaining me! ?

Marshall Mathers - February 24, 2013, 1:52 am

Nice, but another nice thing, you can just go to <http://hsmaker.com/> too :)
("shit, it isn't working on HF :(")

Kenny.

Kenny.

It's been working for me, something must be wrong with your browser.

ComplexXy - February 26, 2013, 12:41 am

Hella cool, it's amazing what you can do with modern browsers these days. I wasn't alive to see it, but I'm pretty sure that a while ago you'd be lucky if you could make your computer talk lol

invisible.shaddow - February 26, 2013, 2:33 am

i'm using google chrome, and did you're steps at my gmail page and it works.

Dyck - February 26, 2013, 1:52 pm

It does work aha, I closed the console and maybe 15 second delay...

Try pasting the code into developer console[ctrl+shift+i -> console](you will have to do allow pasting if you havent already done that command)

Note: It doesn't work that well in firefox, but it works somewhat.
