Thread: [AV's Smudge Style TuT.](#)

Anal Voyage. - February 17, 2013, 4:04 pm

This tut was meant for the dudes who wanted to know how I personally did my smudges. All I did was show the steps from my PSD, so sorry if it's not that straightforward. I don't smudge anymore, so meh. :/
And sorry for the constant hue changes.
I didn't notice I had a photo-filter layer visible at the top. QQ

Nice tutorial. Why did you stop tagging? I really liked your old tags

Thanks. C:
Stopped tagging 'cause it got boring to me.
I wanna focus on vexels and digipainting. ^.^

HIGH PAID FELLA - February 20, 2013, 11:33 am

Nice tut, very HQ.
Keep it up, bro!

Anal Voyage. - February 20, 2013, 7:26 pm

Woops. Forgot the important stuff:
Brush settings: Default hard brush.
Strength: 70-90%.
When you're doing the black and white smudging, use a MUCH smaller brush.
ie, I usually use a 10px brush for the rough smudging, and then drop down to a 1-3px brush with the same settings and varying strengths for the lighting.

Mr.Notorious - February 21, 2013, 9:32 pm

Very nice op tutorial sir ily so much heres a hug :3

I was going to ask for this, right there.

:) Thanks.

I like it but it doesn't seem like the final product is much different than the first one...

LOL OH FUCK.

I deleted the wrong image.

That was supposed to be the final one.

Anal Voyage. - February 27, 2013, 4:04 pm

So yeah, I fixed the tut.

It can be found here:
