You can use this to verify something like a Google Account, or be anonymous and text someone.

<http://www.pinger.com/tfw/>

There's not much else to say about this, just register and go to "Options" and it will show your phone number.

Spoiler ([Click to View](#)) Credit to "Anonymous" for this. ?

Spoiler ([Click to View](#)) Not much like a tutorial, more like a program.

"Free pizza at Papa Johns"

Let's also stipulate that you might have to drive to the store - which cost's money. Maybe you have to call ahead to order or use an internet code, should we not call it free then?

or you can walk, your comparison doesnt make any sence.

you NEED wifi for this to work.

you dont NEED to drive to papa johns.

and it wont cost nearly as much.

dont even.
