Thread: [\[TUT\] How to make a Keylogger in VB \[TUT\]](#)

Hard Style - February 19, 2013, 12:24 pm

Hello guy's in this tutorial i am going to show you and learn, how to make your own keylogger in visual basic!

What can i do with my own keylogger?
You can spy your own computer.

So you will open Visual basic, and make a new project.
Then add 1 textbox , Go to the options and make multi line true.
And make sure your textbox is only reading. so set it to true
Now it look like this;
[img]http://img203.imageshack.us/img203/4678/pic1wt.png[/img]
Then you will add a timer. Now you will double click on your form.
And now copy these codes from picture!

[img]http://img51.imageshack.us/img51/2302/pic2tp.png[/img]
After you did this you will double click on your timer and put enabled = true and interval to 2 :
[img]http://img818.imageshack.us/img818/8362/naamloosil.png[/img]
If you debug your application, You will get a warning. just dont look to it and save your project then run it and it will works 100% perfectly.

-Hard Style ?

Modestep - February 19, 2013, 12:59 pm

I was joking inside myself before i opened this thread "probably a timer", and i was right...

????? - February 19, 2013, 1:04 pm

Why does nobody hook the keyboard anymore?

Yui Asuna - February 19, 2013, 1:09 pm

Lol, just noticed:
Textbox1.Text = Textbox1.Text + Chr(i)
Why bother typing all of this ?
Textbox1.text &= Chr(i)

Still a shitty tutorial...

Temploit - February 19, 2013, 1:17 pm

PHP Code
<?php
For i = 1 to 255
if GetAsyncKeyState(i) = -32767 Then TextBox1.Text &= Chr(i)
Next
Oh well...

Yui Asuna - February 19, 2013, 2:09 pm

I don't see the point of calling that a "tutorial". You are just telling us to C+P a fucking code, probably

C+P from somewhere else too.

Recycle Bin. - February 19, 2013, 2:11 pm

Why do all of you people hate on him so much? He probably just started learning to code. I believe he just wanted to share his knowledge with those members who don't know this. Beside I would bet a bunch of people in here doesn't know what the lines are doing or saying.

w?rlokt - February 19, 2013, 2:13 pm

I have nothing against him, but we've seen these "tutorials" so often. When he want to share this with new members, who are not so good at coding he should name this "noob friendly"

Indeed he could. But anyhow that probably just a mistake from his site.

TickTack - February 19, 2013, 11:41 pm

I'm not sure if you're aware of this OP but your code won't work with 64 bit windows.

TrackPro+ - February 20, 2013, 12:26 am

Now I understand your name, thank you for verifying that. :)
