Thread: [Unresolveable Skype | FREE | NO DOWNLOAD |](#)

?osmo - February 19, 2013, 9:19 pm

Sometimes the registry file doesn't work so just manually add them! :D

Spoiler ([Click to View](#)) Hey, Here is the method to remain 100% anonymous on Skype by hiding your IP.

This very simple.

First, sign out of skype.

Go to <http://www.hidemyass.com/proxy-list/> and find a fast proxy and port

Paste them in here:

<https://dl.dropbox.com/u/33446/twitch/skype.html>

Save to Disk>Desktop

Right click it, and select "merge"

Now Reload skype.

To Verify it worked, sign in, go to Tools> Options> Advanced> Connection

Make sure your settings are like this. (The IP/Port will be different)

Now you will be 100% Anonymous. If your Proxy ever dies, simply right click the file on your desktop > Edit, and find a new proxy/port.

Post if this helped you at all! :)

Thanks for sharing mate. I was adding the proxy directly to skype.

Btw is the file, sharing the proxy among others?

ryoh - February 19, 2013, 9:40 pm

Calls don't work with this, I knew about this months ago.

Dex? - February 19, 2013, 9:44 pm

Neat idea except I couldn't find any proxies that worked.

When you say "Right click it, and select merge" do you mean on the file just saved to the desktop? I have a mac btw and can't find "merge" when I right click on the file..

You leached this shit, and it's old as fuck anyways. Stop complaining that people haven't posted on it.

Aged - March 15, 2013, 4:24 am

Thanks for this mate, I will use this.

Aina - March 15, 2013, 5:08 am

It works but the proxy will end up in like a hour or so. I recommend a VPN instead.
