Thread: [SBSettings alternate](#)

Neat - February 20, 2013, 1:12 am

Since I updated my iPhone 4S to iOS 6.x and the 3G on SBSettings tweak doesn't work properly , When I turn 3G on/off via the tweak it does nothing.

Any other alternate around ?

drugs - February 20, 2013, 7:43 am

You can try out NCSettings. It's SBSettings except the toggles are in the Notification Center.

Neat - February 20, 2013, 8:09 am

I tried it but it got the same issue, any other?

?Juggernaut - February 20, 2013, 6:15 pm

It doesn't work for me either, I think it's because your phone and my phone don't have 3G. We have 4G/LTE.

Grin - February 20, 2013, 8:39 pm

Then turn off Data.

Your IP for it should be either N/A or it may redirect you to 127.0.0.1.

So no tweak out there for iPhone 4S which does the trick?

Dreams - February 20, 2013, 11:14 pm

You could try auxo, but this is in the multitasking place, not the top of your screen.

Neat - February 20, 2013, 11:23 pm

Thanks Dreams for your suggestion, tried it before. Got the same problem.

Elweth - February 21, 2013, 3:43 am

I had the problem too, I just went to uninstall the tweak, reboot my phone, and reinstall and everything works fine from then on.

Neat - February 21, 2013, 10:10 am

Yashiro Isana; what's your iPhone model?

Grin - February 21, 2013, 10:52 am

Auxo has ugly rectangular toggles and it's pricey.

Neat - February 21, 2013, 3:03 pm

Ya , but it's free via biteyourapple , xsellize and ihacksrepo sources.
