Thread: [\[PHP\] Server script aka Tracker | Live statistics | Easy to use!](#)

radde94 - February 20, 2013, 2:18 am

Hello,

I've coded my own Tracker just like GameTracker but no delay on the statistic, works for the following games,

Counter-Strike: Source
Counter-Strike: Global Offensive
Counter-Strike: 1.6
Day of Defeat: Source
Fortress Forever
Garry's Mod
Half-Life 2 Deathmatch
Left 4 Dead
Left 4 Dead 2
Minecraft
Team Fortress 2

No custom plugins is needed to add on the server, just IP:PORT and you are ready to go. I will code a rank and past 24 hours players soon. The script is new so be nice, I coded it yesterday.

The image design ain't good at all, I suck at photoshop, no joke.

To use this script,

<http://hl2gamers.eu/tracker/index.php>

Enjoy!

Regards,
Michi

I will look into it, it's using another engine. Not the same as HL2 games.

Update with 1.6 will come :)

--

Currently working on 1.6, and progressing.

Release today! :)

--

Done with it, will release it soon.

:)

--

Counter strike 1.6 has been added

Enjoy!

Vouch for my dude!

Yet again, awesome site!
