Thread: [Want a Custom Bot made Personalized just for you?You better check this HOT thread now](#)

EpicMonetize - February 21, 2013, 11:08 am

Hey guys, this goes out to all of your out there, that can't find the exact bot that is just right for you annnnddd.... you can't code! Think that you may be one of those people? Well im here to help. Ill be making for a limited time, CUSTOM BOTS for people.

Details:

Tell me what site you want your bot to run on.

tell me your budget for the bot.

if i accept your project bot, i will need to know every detail you want your personalized bot to fulfill.

All bots will come with 1 month of free support and updates. Maintenance fees will apply according to how complex the bot is after the one month of free support is finished.

Maintenance fees may run anywhere from \$1.00-\$20.00.

Bots created will be able to support the following features (more upon request)

Multithreading

Proxy Support

(depending on website) Single socket support making bots extremely fast

Captcha support deathbycaptcha ECT.

User Agent Switching (please inquire on thread or via pm if you don't know what this means)

Auto clear cookies on every loop

Any number of loops the bot does set by YOU.

Number of threads chosen by YOU

And many more!!

Ever see a bot that you wanted but was just wayyyy to expensive?! Tell me about it, my prices may

be lower!

Be creative! Im up to almost anything!

Cheers guys!

How much would it be for a simple YouTube bot that could get me 5,000 Mobile Views per day? It would simply be used for my own benefit and no reselling would be included which is why I only need a small view per day count. Thanks and F the USA, I am the Hide and Seek Champion.

EpicMonetize - February 21, 2013, 11:36 am

Really the price comes down to how long it takes me to do the bot + the complexity of it. The way its sounding it would probably only cost around 10-15\$.

What im sensing that your wanting this to include is...

Multi-threading to get the views done faster.

Proxy support with (only mobile user agents?) correct me if im wrong on that.

Or do you want a mix of mobiles and home browsers.. i can also use things like Yahoo slurp.. ect. Possibly a command that can pause the bot for a predetermined interval set by you to spread out the views your video gets.

(would look fishy all of a sudden video has 5k views from 0 lol)

OOO just had another lil snippet idea,,,, I can Make it to where you can choose how long you want each bot to stay and view your link. I could even make it to where it skips to a certain part of video.. maybe pauses it, waits 3 seconds then plays it.

(all things to make it look more human!)

let meh know if u like what i have so far/want more!

So you could make me a Mobile View bot with Proxy and Threaded Support and extra's?

For \$10 could I get a Bot that gives me Mobile Views (makes bot cheaper), without me having to get proxies, and it gets me 5,000 views a day?

EpicMonetize - February 21, 2013, 11:46 am

so what your saying is that you dont want proxies but you want the user agents all to be mobile agents? yeah im pretty sure i can do that.

ohhh or do you want me to already have a list of proxies for you?

I think so haha. I'm no good with bots or coding. I simply want a view bot that can do up to 5,000 views a day so I can bot my views for partnership or simply for money :). How much would it be for this, but with the referrer set to Facebook, Twitter and Reddit?

Thank you for all the help and being patient!

EpicMonetize - February 21, 2013, 11:49 am

The only problem with that (me giving you proxy list) is the become out dated ,and spammy quick. I could code a proxy scraper if you'd like. i have the free version of my scraper on HF here somewhere, go look through my threads and find it.

But please let me know if i got it right or not, i want us to be straight so you get exactly what you want!

Sweet, well I should be able to scrape some proxies from my Cracking programs, :). The only problem is that I am unsure if I have \$10 in my Paypal. If I cannot send the money, then I will be able to on Thursday/Friday next week. Unless, of course, I do have the cash. :)

It's cool with me if you want to wait till I definately have the cash :).

sounds good mate, i will start up on this asap!

will keep you updated!<3

i can automate almost anything you can think of mate.

working on a few projects for people, may be open to 1 or 2 more submissions for right now!
