Thread: [?Free Instagram Bot? \[Get thousands of legit likes and followers\]](#)

Diamond Supply Co. - February 23, 2013, 3:07 pm

Simple Instagram bot that I found online. It works perfectly. It likes pictures based on the hashtags that you provide.

It likes around 1,000 pictures per hour. When you like peoples pictures, they will follow, like and comment on your pictures!

Message me for this.

No requirements, but I have the right to not send you anything.

Be patient, and if you PM me twice, you will be blocked.

Thanks,

Diamond Supply Co.

I think that this one has some trojans too. Can anyone analyze this result?

I don't want to harm anyone here, just want to know if it's really safe. I want to use this tool, anyway, thanks Diamond.
