okay, decent case for \$10 i would say. dont expect a \$100 thermaltake but man this is great for replacing those old computer with some flash in your room, yknow the ones that look bland and you dont use as much :p.

Just bought it. Sadly, it has \$10 shipping but I guess it's a good deal.

I love how newegg surprises me with next day shipping :)

In total, it was \$30 when I bought it. I'll send in the rebate next week so it will go down to \$20. Using this for my home theater pc. <3 Will post pictures when it arrives tommorow.
