I no longer have anything to do with this project.

nrd - February 24, 2013, 4:17 pm

nice thread layout! also application looks easy to use, good luck with sales!

DarkComet™ - February 24, 2013, 4:19 pm

Lucky you got the thread design mate :D

Anyways, nice crypter you got here! I may look into this in the future :)

Maghbool - February 24, 2013, 4:36 pm

Thank you. If anyone wants to purchase simply click the thread, new update will be done by TONIGHT.

N3oNight - February 24, 2013, 4:59 pm

This is the Second Crypter released today on HF.

Best of luck with the sales.

Maghbool - February 24, 2013, 5:10 pm

I am NOT giving out vouch copies of the crypter.

I'll assure you it works, if not, I'll refund you.

Reefer - February 24, 2013, 5:16 pm

Very interested in this. But I'll wait til there are some reviews.

Alright, if anyone is interested sales are going on including a new update getting released either tonight or tomorrow.

StayDope - February 24, 2013, 6:24 pm

Just bought this crypter! Works great and excellent! ?

SkyRider - February 25, 2013, 1:41 pm

who coded this i don't think you did

Mr.Black - February 25, 2013, 1:54 pm

My sales partner & me coded this. Me and him both have put in time / effort in a long time creating the crypter completely from scratch. We divide the profit up with each other.

Maghbool - February 26, 2013, 2:18 pm

Crypter has updated with a lot of new features, including new thread design/website opening up.

BTW, crypter is UPDATED now, it's in the process at this moment. Anyone waiting to receive there login wait for 2 hours please.

Envoy_angel - February 26, 2013, 4:22 pm

VOUCH, bought in within minutes had my crypter up and running! great crypter!

Maghbool - February 26, 2013, 4:57 pm

Updated thread to our new version. New site coming out soon.

ObamaCare - February 26, 2013, 5:16 pm

Wow this is extremly cheap. I vouch for this legit user ;)

Maghbool - February 26, 2013, 5:18 pm

Thank you for the vouch Riz. We have just updated the thread design.

A lot more smooth and clean looking.

Film - February 26, 2013, 5:37 pm

That's what my sales partner recommended, probably will do it tomorrow.

Maple ?? - February 26, 2013, 5:47 pm

Because you'll get a LOT of customers at first and then in the long run you'll be reFUD'ing it and you'll be making no money.

Can I buy a lifetime spot? ;)

Maghbool - February 26, 2013, 6:28 pm

@Debug, I'm getting this resolved. It's just a misunderstanding. My computer / skype went unresponsive last night.

Tinhead - February 27, 2013, 1:57 pm

Just purchased this with a 6 Month licence and Dunya was a very nice person.

I would recommend buying this for anyone, Vouch for Dunya. Hope you get more sales soon.

Zeroless - February 27, 2013, 2:45 pm

Vouch for the Product, ;) Nice support .. it also Crypted my .net file where 2 other crypters faild.

Maghbool - February 27, 2013, 3:39 pm

Thank you for the VOUCHES! Still selling guys so HMU!

debug - February 27, 2013, 5:50 pm

Update 1.0.0.2 released.

- ReFUD

- ReFUD binder as well

- New Compression Method

- Smaller size

- Fixed encryption key button (Had code commented out while debugging, woops.)

Maghbool - March 1, 2013, 7:30 pm

Hey, we're selling again and we'll be looking for new options for storing the data.
Thanks.

Envoy_angel - March 1, 2013, 11:39 pm

so is this crypter working now or is it not?

Maghbool - March 2, 2013, 7:14 am

The crypter has always been working, we just fixed some bugs and now it's fine.

Spacket - March 2, 2013, 9:16 am

I payed already for the crypter, when will i get it? Just asking :)

Gangstahpy - March 2, 2013, 9:37 am

Just bought this, waiting for the crypter.

Maghbool - March 2, 2013, 10:00 am

Crypter & Information is being sent out to all of those who paid.
Thank you! :)

Gangstahpy - March 2, 2013, 2:50 pm

Vouch for this crypter, thanks alot

Maghbool - March 2, 2013, 3:59 pm

Still selling everyone, also purchased a hosting/domain for our crypter so we can soon have a automated system, for now you can use our current one.

Vehicular - March 2, 2013, 11:47 pm

Just bought this for three months, waiting to receive it and try it out :)

Vouch for this Crypter, one of the best and cheapest on the market.

Maghbool - March 3, 2013, 2:09 pm

New site is about to launch :)

Well still selling!

Evil Bob - March 3, 2013, 2:45 pm

Does this crypter work with DarkComet and Blackshades servers? If so, PM me and I will buy this asap. Thanks!

Yes it does, as we stated on our thread and I PM'd you.

Evil Bob - March 3, 2013, 3:46 pm

Just bought, waiting for the crypter.

darkdudex - March 3, 2013, 4:33 pm

works great really easy to use and most important its FUD :) big vouch

Evil Bob - March 3, 2013, 8:32 pm

Works great. The scanner doesn't work for me for some reason but the FUD is more important so i dont mine ;)

Chloë Grace - March 4, 2013, 9:47 am

Will this work with Silent miner? (.net 2.0 dependent)

EDIT: Just paid. I really hope this works with Silent miner :P

EDIT2: Just got my licence details! Looks great. I'll be posting actual results in a bit.

Vouched =)

Heresys - March 4, 2013, 2:40 pm

Artisanal - March 6, 2013, 1:03 pm

Looks like a really great crypter ?

barackobieber - March 6, 2013, 2:37 pm

Bought the crypter earlier, waiting to get it :)

EDIT: Received crypter but I was stupid enough to mess something up. Dunya was nice enough to help me get it fixed, so I will edit this post again with results once I've tried out the crypter.

Maghbool - March 13, 2013, 7:22 pm

Will still selling the crypter guys :)

So buy if you want :) Before prices go up soon.

OIPA - March 14, 2013, 7:22 pm

Works great after the last update but gets detected by Avira at the moment.

Maghbool - March 15, 2013, 1:46 pm

Still selling.

Currently FUD, just scanned now.

debug - March 15, 2013, 5:37 pm

Update 1.0.0.7 is out guys! Here is the changelog from the news.

Quote:Hey guys. Fixed a good bit in this update.

Changes:

- Reworked the storage method a bit.

- Better Compression

- Changed stub workings

- New Injection method (Removed Avira)

- FUD on DarkComet/Athena/BlackShades(Tested)

Enjoy

Maghbool - March 15, 2013, 8:11 pm

New update. It's currently 0/37 and working great. Long lasting FUD.

Maghbool - March 16, 2013, 11:28 am

Sales are still up and going, currently online on aim/skype.

ChemicalCheatsModerator - March 16, 2013, 1:04 pm

We'll look into that, I just checked and the binder is working.

debug - March 17, 2013, 9:44 am

The binder is working, but currently with just 1 exe file. It has been fixed for the next update.

Maghbool - March 17, 2013, 3:54 pm

Hey guys, fixed some important things in this update.

1.8

Changes:

- Fixed binder not working with multiple file types
- Added assembly changer
- Fixed Scanner

avanda1121 - March 18, 2013, 1:26 am

Big vouch for debug!Crypter is easy, working and FUD.

Thanks for the purchase.

Since I get asked this more often than necessary, please read.

"The crypter isn't FUD, what do I do?"

Stop and check these few things before contacting me.

-Filename. If your filename is something like "crypted.exe" or "svchost.exe" some AV's will detect that.

-Startup Key. Similar to file name, "svchost" or plainly ".exe" will be detected as a startup key name.

-Assembly. Try adding an assembly, legit usually works opposed to fake.
