Paypal is being a gay in the last time and they limited me 13452 accounts :S

I lost more than 500 dollars ? ...

Alertpay is better they are not gay and will not limit your acc because of some shit ...:S

I think it would be good if we split marketplace on Alertpay/Paypal users..

That would be really good kuz im not the only member that paypal fucked up..

I think that more than 50 percent of them got fucked up at least once...

So what do you think..

P.S "MODS, Please do not flame"

Sorry for my English
