Thread: [Looking for a host to host my shell booter](#)

Blu_ - February 26, 2013, 4:51 pm

I am making a shell booster, but I need a free web host similar to SPAM to host the site. Since 000 blocks booster scripts I can't use them. :/

Anything someone could recommend? (Note that I don't have the money to spend on a paid host)

Any answer is appreciated :)

?

Any successful shell booter will need a paid host.

If not in it for the long run..then why start at all..:/

<http://www.freehosting.com/>

Have you even googled it?

Thanks for the site. I did, but I figured HF would be the best place to ask to get this kind of info :P
