(Dec 22, 2012 01:46 PM)Elements. Wrote: [\[CITE\]](#) Vouch! Legit program! The shitcash is worth it!

(Dec 23, 2012 03:38 AM)H3X4G0N Wrote: [\[CITE\]](#) Great keylogger! Absolutely wonderful, I'm currently keylogging myself to test the keylogger. It's great how the logger runs as taskmgr, you'd never expect it!

Built-in file pumper is also extraordinary.

Best part I'd say is no portforwarding, just setup an FTP account and you're set!

Homi is super HQ, helped me out with everything I needed.

(Dec 26, 2012 08:08 AM)Cazma Wrote: [\[CITE\]](#) This keylogger is really fucking great! Works like a

charm :D and the best thing is, almost no anti-virus program will detect it! Sick

Just wondering, if you include the ftp login details in the program itself, won't you eventually get hacked? I always find it quite fun to download random programs on youtube and decompile them. Good luck with sales!

Good luck with sales!

99% of users are not as smart as you are :)

but its a valid point, and therefore i have added many ftp domains, random usernames and passwords to make it difficult for guys like you :D

i might even encrypt the strings if a customer feels insecure.

C++ FTW!! Only thing I could suggest is smtp logging. I may buy then. It adds it's self to registry for startup right?

Nice, I will probably buy soon. Once i get access to the computer i need to keylog. If I wanted to make some little tweaks, would you sell me the source for PERSONAL use only (I will not leech)?
