Thread: [Suggestions on Monetizing Methods](#)

SIM-1223642 - February 27, 2013, 2:05 am

Dear Hackforums,

I would like to invest around \$15 ~ \$20 into a monetizing method sold on this forum.
I have looked at few of the sticky posts however, I cannot decide which one to choose.

I would be great if the technique had:
99.9% to 100% Guarantee Rate

Price I mentioned above (Can go to \$25)

Stable and consistent payments

Willing to dedicate time, however least would be preferable

Lifetime support & Updates

And 100% legal

Please consider my conditions and recommend me some options.

The reason why I want to try this method of earning is because
our family just received permanent residency in Australia finally after 7 years of very hard work from
my parents.

I am 15 years old and of course I want to work however, I have to focus hard on school.

This means I barely have anytime to spare, sometimes staying up until 3 in the morning.

I really want to help my parents out since they have a lot to pay.

I know this isn't the moral way of earning money, not actually working and earning however, this is
the situation I'm in so please understand dear users.

I will be happy to invest up to \$50 if necessary.

Please suggest a trustworthy user and method and it would be
very grateful.

Thanks very much :)

99.9% to 100% Guarantee Rate -> success rate depends on you

Price I mentioned above (Can go to \$25) -> you dont even need an paid eBook to be honest, try the
"search" function

Stable and consistent payments -> again, it all depends on you

Willing to dedicate time, however least would be preferable -> nothing comes free in life, you dont
work, you dont get shit all

Lifetime support & Updates -> seriously what, updates on the eBook, honestly, if you are in the
monetizing industry, you should be able to spot out any updates on trends and niches without being

spoonfed

And 100% legal -> everything is legal here, Omni made a very strict rule to forbid Black Hat Monetizing.

well, you can learn everything free in this community, you don't need to invest here for learning.

There are many who can actually help you out.

I personally can help you get started!

Hit me a pm whenever you get stuck :-)

Thanks for your responses people :)

I appreciate it.

I will do more research and come back.
