Thread: [Unitedpaycheck.com Best Money Making Method!:\) Proven Method, Guarantee Money!:\)](#)

WojnaRR - February 27, 2013, 1:12 pm

Hi all i visit this forum since about 1 year but never ever registered but today the time has come:) Let me tell u my money making method:)

I looked at the last number of programs that appear on the network. Recently, I joined to promising program called United Paycheck. I do not know if u had been in contact with this program so I will try to go a little closer to you.

Basically United Paycheck (UPC) can be defined as a successor ProfitCliking, as well as a kind of hybrid PC with elements of BB. :)

How does the program and what we earn?

Ways to earn a few:

-> Basic is buying AdPort's and reap the profits from it daily. One such AdPort cost us \$ 20 and gives us a profit of \$ 0.30 for 100 consecutive days of its expiry. To sum up for one AdPorta get \$ 30 after 100 days.

The money earned each day end up in our portfolio. Then we can withdraw or reinvest by buying another AdPorty.

Maximum number of owned "live" AdPorts is 500 per user.

-> AdPort after "living" 100 days stop to pay us daily gains and change in AdBank-s One AdBank formed with four finite AdPorts. Formed in this way, 6-Local Matrix "matures" automatically about 3-5 months. The mature matrix receive \$ 120. However, there are ways to speed up this process, consisting of paid fill the remaining 2 slots for the amount of \$ 40.

-> Draws a very interesting way to earn from referrals. Namely, the program aims to build a team and put a lot of emphasis on it that our structure was created equally. Then we are able to get higher profits.

I will try to bring a little way of functioning of the system:

Each member can create more branching structure. The program determines the division as Team Left and Right Team.

For every direct referral you get wired in to the structure of \$ 1 from each purchase of his AdPort. This is known as Direct Referral Incentive.

Additional perks we get by Binary Incentive, the calculation of cooperation between the two parties.

Simplifying - If both of our teams are evenly developed, we are able to obtain additional financial benefits depending on the amount held by the team Adport.

Here u have proof that they really pay and we get rly nice money:

Enjoy!:)
