Thread: [Re-Made Thread Design](#)

Hoenb - February 28, 2013, 4:43 pm

Okay, my last thread design was pretty shit..so I threw this together in literally 1 hour. I wanted to see what I could do when I looked at some other popular thread designs. This is what I came up with. I didn't use any crosshatch background on the boxes or use a diagonal line overlay, IDK how to say it. Anyways, here you go. Next time I'm not going to use rounded rectangles.

The thread design looks great, the lighting fits.
10/10

Hoenb - February 28, 2013, 5:44 pm

Updated the thread design by changing the stocks in the background. The 2 top stocks look a little alike, but they are actually completely different. ._.

10/10
This kind of feedback is not helping him. The colours in the design are dull and shadows too overdone. The concept isn't original and font isn't pleasing to read.
