You're a complete moron. Deface a page and point to an "ethical hacking" forum?

That's just all kinds of stupid.

VipVince - March 2, 2013, 9:11 am

That deface page is pretty legit.

amus3d - March 2, 2013, 9:19 am

You should really delete your uploader shit...

Defacing is stupid -.- You could make money with an exploit, imagine it's a famous game you could get account data and sell them instead of defacing and alerting them that the site is vulnerable, that way you probably will be famous but you will earn 0 cash I'd rather have cash than fame!

I don't understand why you are exposing your name.
Salam :)

I'm assuming that this isn't the official site of HTP then?

I don't 'kid' Mr. puremind. HTP does indeed have a website where they show off their government hacks among other cyber war victories.
