Thread: [FYIBooter V5.0 - Confirmed Features](#)

Kyle FYI™ - March 2, 2013, 4:53 pm

This is just a quick list of features that are confirmed in FYIBooter V5.0.

[*] Completed

[] In development/Next update

[?] Undecided*Start Attack

This will send the attack to the server('s) we have.

*Stop Attack

This will stop your attack allowing you to start a new one.

*Host to IP

This will grab the host you provide and resolve its IP Address and put it right in the target box for you.

* Quick Enemy List

This is a list on the boot page allowing you to see your enemies list, click on the one that you want and it will put it in the target box.

*Cloudflare Resolver

This will try and resolve the real IP Address even though the host is behind cloudflare.

*Skype Resolver

This allows you to resolve skype names and get the IP Address.

*Friends List

This will block your friends IP Addresses from being hit.

*IP Logger

This will give you your own link on FYIBooter allowing you to send it to your friends/enemies to grab there IP Address.

*Steam Resolver

This will try and resolve steam usernames the best it can.

*GEO Location

This will try to find out the general location of the IP Address you provide.

\Account Security

This will give you 3 options, which are - Disabled; It disables any security on your account except the password. Medium; It is locked to your ISP/IP Range, if this changes you will need to verify it via email.

High; It locks your account to your IP Only, if this changes you will need to verify it via email.

\Boot schedule

This is where you can arrange a boot to start at a specific time.

\Recent Payment Logs

You will be able to see your recent payments.

There is a lot more planned but these are the main ones for now. I will be adding a lot more things in mainly on the backend though.

St3ph - March 2, 2013, 4:55 pm

Have you got any screenshots of it at the moment?

KyleWTF - March 2, 2013, 4:55 pm

Seems nice. I can't wait to finally sell this product.

Pun intended.

Goodies - March 2, 2013, 4:55 pm

Whenever this comes out I know it will be amazing. KyleFYI is an awesome member with one hell of an avatar xD

AnonVendetta - March 2, 2013, 5:07 pm

Nice to hear Kyle, i won't have to keep asking on skype. :)

~Legendzz

~Tom~ - March 2, 2013, 5:10 pm

Vouch for Kyle the stupid fag, bad luck with sales ?.

Leg?nd - March 2, 2013, 5:12 pm

So 2 unique things in this whole list, GLWS OP

Codevade - March 2, 2013, 7:55 pm

Recent Payments and Boot Schedule are the only two things that are not very common. There have been services before that have scheduled attacks via CJ I believe. Down to minute accuracy via CJ and DB Query.

(Mar 2, 2013 06:12 PM)Leg?nd Wrote: [\[CITE\]](#) So 2 unique things in this whole list, GLWS OP
At least he'll be using a unique source unlike some people ?

Codevade - March 2, 2013, 8:32 pm

(Mar 2, 2013 09:11 PM).Twilight. Wrote: [\[CITE\]](#) At least he'll be using a unique source unlike some people ?You again. It is a well known fact that 80% of products that are designed for stress testing use the same C+P source. Thank you for noticing.

Scooby Doo. - March 2, 2013, 9:16 pm

Sounds cool, I hope us life timers still get to have our accounts like you said we would a while ago.

.Twilight. - March 2, 2013, 11:50 pm

I was just implying that he shouldn't be the one pointing out other's mistakes.

~Tom~ - March 3, 2013, 1:06 am

(Mar 3, 2013 12:50 AM).Twilight. Wrote: [\[CITE\]](#) I was just implying that he shouldn't be the one pointing out other's mistakes.

You're using a leaked source too so you can't say much ?.

betamonkey - March 3, 2013, 1:12 am

Kyle FYI: Nice feature list, but I really would avoid anything that stores logs of actions/payments. I mean, that can come back to haunt people if you were hacked or investigated. just a thought.

.Twilight. - March 3, 2013, 1:17 am

(Mar 3, 2013 02:06 AM)~Tom~ Wrote: [\[CITE\]](#) You're using a leaked source too so you can't say much ?.

Oh it's you again. Why don't you step off your high horse and fucking take 2 seconds to think about your attitude. All you ever do is talk shit to other people and downtalk them. The shit you say is usually completely wrong or completely biased. In this case, it's both.

Please don't spread lies. You have no proof to back up any of your claims.

~Tom~ - March 3, 2013, 1:19 am

(Mar 3, 2013 02:17 AM).Twilight. Wrote: [\[CITE\]](#) Oh it's you again. Why don't you step off your high horse and fucking take 2 seconds to think about your attitude. Oh why do you get so mad :). What you just said is complete bullshit I don't really "talk shit" or down talk" anyone for no reason and I certainly don't do it a lot.

.Twilight. - March 3, 2013, 1:21 am

(Mar 3, 2013 02:19 AM)~Tom~ Wrote: [\[CITE\]](#) Oh why do you get so mad :). What you just said is complete bullshit I don't really "talk shit" or down talk" anyone for no reason and I certainly don't do it a lot.

I get mad because you don't have anything to back up your claims with. All you do is throw biased opinions at people for no reason other than to make yourself have some false sense of intellect.

What's the reason you're talking shit to me now? Do you have a reason?

~Tom~ - March 3, 2013, 1:24 am

(Mar 3, 2013 02:21 AM).Twilight. Wrote: [\[CITE\]](#) I get mad because you don't have anything to back up your claims with. All you do is throw biased opinions at people for no reason other than to make yourself have some false sense of intellect.

What's the reason you're talking shit to me now? Do you have a reason?

Yes, that's why I do it. You're using a public source which is just edited.

.Twilight. - March 3, 2013, 1:33 am

(Mar 3, 2013 02:24 AM)~Tom~ Wrote: [\[CITE\]](#) Yes, that's why I do it. You're using a public source which is just edited.

And yet you fail to provide proof. I coded it from scratch. The only thing that isn't scratch is the buy page that was given to me from a friend a while ago.

~Tom~ - March 3, 2013, 1:35 am

(Mar 3, 2013 02:33 AM).Twilight. Wrote: [\[CITE\]](#) And yet you fail to provide proof. I coded it from scratch. The only thing that isn't scratch is the buy page that was given to me from a friend a while ago.

Show some proof then, you wernt even willing to show even a small code snippet.

.Twilight. - March 3, 2013, 1:36 am

(Mar 3, 2013 02:35 AM)~Tom~ Wrote: [\[CITE\]](#) Show some proof then, you wernt even willing to show even a small code snippet.

You show some proof of it not being from scratch. Please tell me which source you think I skidded.

Can you accept Liberty Reserve. Some of us more secure members do not wish to use E-currencies such as Paypal who conform to such harsh treatment of their customers.

I am willing to purchase your services and analyze in depth your attack methods and output and I will post an honest unbiased review.

~Tom~ - March 3, 2013, 1:38 am

(Mar 3, 2013 02:36 AM).Twilight. Wrote: [\[CITE\]](#) You show some proof of it not being from scratch. Please tell me which source you think I skidded.

Are you serious, did you just say "skidded" :OMG:. This thread isn't the place to be discussing this so kindly move on.

iLikePonys - March 3, 2013, 3:20 am

This is a paid vouch untill 3 March 2013. GLWS OP.

Unfortunately, I don't. I just withdraw the PayPal from an atm and stash the cash.

I will be paying Starfall to test the security for me. So I am hoping this doesn't happen. I will however be clearing logs a lot.

(Mar 2, 2013 10:16 PM)OG Paragenik Wrote: [\[CITE\]](#) Sounds cool, I hope us life timers still get to have our accounts like you said we would a while ago.

Yes you all will, just need to provide your old username and email and you'll get a brand new lifetime account!

(Mar 2, 2013 09:32 PM)Codevade Wrote: [\[CITE\]](#) You again. It is a well known fact that 80% of products that are designed for stress testing use the same C+P source. Thank you for noticing.

This is fully custom coded by me, well not fully. I suppose you could say the library I am using to

connect via SSH isn't custom... Other than that its fully custom.

Codevade - March 3, 2013, 5:22 am

(Mar 3, 2013 05:47 AM)Kyle FYI™ Wrote: [\[CITE\]](#) I will be paying Starfall to test the security for me. So I am hoping this doesn't happen. I will however be clearing logs a lot.

This is fully custom coded by me, well not fully. I suppose you could say the library I am using to connect via SSH isn't custom... Other than that its fully custom.I made no such statement that your product was C+P. Just that most on HF are.

Kyle FYI™ - March 3, 2013, 5:28 am

(Mar 3, 2013 06:22 AM)Codevade Wrote: [\[CITE\]](#) I made no such statement that your product was C+P. Just that most on HF are.

Yes I know that, I just wanted to say. Most booters on the HF Market uses the same source with a different theme off themeforest.net. I will admit i'm using a theme off there but at least the source its self is custom.

DaL33T - March 3, 2013, 5:42 am

True that but the layout is still horrible.

Spoiler [\(Click to View\)](#)

Just kidding, the features look good, not much difference from the others but still.

Spoiler [\(Click to View\)](#)

Yes, DaL33T I stole your idea.

Nob - March 3, 2013, 6:23 am

You know, even if Starfall tests the security for you, if some government agencies want to seize your website and your DB, they can do it ! You should more likely don't make any logs, or give the option for your customers to delete them.

Kyle FYI™ - March 3, 2013, 6:40 am

(Mar 3, 2013 07:23 AM)Urgo Wrote: [\[CITE\]](#) You know, even if Starfall tests the security for you, if some government agencies want to seize your website and your DB, they can do it ! You should more likely don't make any logs, or give the option for your customers to delete them.

I need to view the logs though, after i've viewed them customers will be able to remove the logs.

Zabibaaa - March 3, 2013, 10:55 am

Looks great Kyle. Will the boot process be Ajax'd?

DaL33T - March 3, 2013, 11:02 am

(Mar 3, 2013 11:55 AM)Zabibaaa Wrote: [\[CITE\]](#) Looks great Kyle. Will the boot process be Ajax'd? If it's not, I will slave-labour myself into doing it for him.

Network Administrator - March 3, 2013, 11:03 am

Good luck kyle, sold him scripts. Hope to see this go big. ?

Zabibaaa - March 3, 2013, 11:52 am

(Mar 3, 2013 12:02 PM)DaL33T Wrote: [\[CITE\]](#) If it's not, I will slave-labour myself into doing it for him. You should, haha. I love Ajax'd booters and most booters on here don't utilize ajax. I guess because they don't know how to code.

Kyle FYI™ - March 3, 2013, 1:11 pm

(Mar 3, 2013 11:55 AM)Zabibaaa Wrote: [\[CITE\]](#) Looks great Kyle. Will the boot process be Ajax'd? I'm using jquery for that ;) So much more simple. Almost everything will be done with it though. 1 or 2 things i'm unsure about at the moment but wont know for sure until its done.

Zabibaaa - March 3, 2013, 1:46 pm

(Mar 3, 2013 02:11 PM)Kyle FYI™ Wrote: [\[CITE\]](#) I'm using jquery for that ;) So much more simple. Almost everything will be done with it though. 1 or 2 things i'm unsure about at the moment but wont know for sure until its done.

Eh, I guess DaL33T will have to slave-labor and do it for you :/

Anyways, good luck with the project. I can't wait to see it!

Kyle FYI™ - March 3, 2013, 2:30 pm

Its a lot like ajaxs just better in my option, sends requests and everything with out refreshing the page.

Zabibaaa - March 3, 2013, 2:47 pm

(Mar 3, 2013 03:30 PM)Kyle FYI™ Wrote: [\[CITE\]](#) Its a lot like ajaxs just better in my option, sends requests and everything with out refreshing the page.

Oh really? I didn't know that, sweet! Does it keep the options in the field? Like for example if I boot an IP and it sends does all the info stay in the box?

Kyle FYI™ - March 3, 2013, 3:34 pm

(Mar 3, 2013 03:47 PM)Zabibaaa Wrote: [\[CITE\]](#) Oh really? I didn't know that, sweet! Does it keep the options in the field? Like for example if I boot an IP and it sends does all the info stay in the box?

Yes it does, I might remove that though as it will make it easy for someone to auto click it.

vampiro - March 3, 2013, 3:40 pm

Lol @ everyone acting like this project is a big deal. Not that hard to do a cron job for the future boot
Imfao. Glws.

Zabibaaa - March 3, 2013, 3:49 pm

(Mar 3, 2013 04:34 PM)Kyle FYI™ Wrote: [\[CITE\]](#) Yes it does, I might remove that though as it will
make it easy for someone to auto click it.

I hope you don't remove it! I like it because it much easier, for me at least. Especially if you're
gonna have UDP-LAG. Anyway, do you have an eta for the release?

LinuxMaster - March 15, 2013, 8:46 pm

Bro, I bought your FYIbooter (lifeterm), but its been 4-5 months its been down...just keep seeing
these new v5.0 posts but never is released :/

Farcast - March 15, 2013, 11:05 pm

That boot schedule is pretty cool, however it might lead to people booter every 5 mins even when
they go offline.

Kyle FYI™ - March 16, 2013, 5:53 am

(Mar 15, 2013 11:05 PM)Farcast Wrote: [\[CITE\]](#) That boot schedule is pretty cool, however it might
lead to people booter every 5 mins even when they go offline.

You will only be able to have one at a time.

LinuxMaster - June 19, 2013, 9:52 pm

you suck, the booter (fyibooter) has been down for 5-7 months now, and I bought it for \$30, reject.

I Am JT - June 19, 2013, 10:13 pm

Sounds interesting. Got any screenshots of the design?
