Quote:Quality of Information: 4/5. It could be a little bit better, but it explains how to get a MSDN pretty thoroughly. It includes the steps, etc to help you out.

Ease of Use: 4/5. It shows you how to do it very well. Easy to use, because it goes in steps.  
Layout: 3/5. I don't like the font on it, just makes my eyes hurt. This is more of my personal opinion.  
It's layed out very well though, goes from step to step in the right order.  
Grammar: 3/5. It's written in decent English, easy enough to read.  
Originality: 2/5. I've seen MSDN before a bunch. However, the originality of the guide is a 5/5. You can clearly tell he made it (watermarks everywhere, etc)

Notes: If you want to get into MSDN, this could be your guide. You can also probably ask him for support and he'd help you out to a degree.

Quality of Information: 4.5/5 It's alright.  
Ease of Use: 4.5/5 It tells you what to do in a good way.  
Layout: 2/5. I dislike the layout, but this is because I'mvery picky with this. It's alright.. though.  
Grammar: 3/5. Okay.  
Originality: 3/5. You can see he made it, and he added nice details that could drastically improve your chances.

Notes: This is a MSDN Network partner guide, but it's not for certain that you're going to get one; so don't whine.

Cheers!

So what you are saying is that if I buy this guide I have a chance of getting 6-8 NP accounts out of 10 attempts? Seems like pretty good odds has anyone else tried this?
