Rat Support

Hello!

I am running a simple support for ratting.. theirs not that much to explain. What we help with is below.

We Help With:

- = Crypting
- = Port Fowarding
- = Downloads
- = General Questions
- = Rat Testing (Yes we test it !)
- = Setting un No-IP
- = Tips on Spreading. (We have a free custom made e-Book also!)
- = And Much MORE!

We Support The following:

DarkComet

CyberGate

BlackShades

jRat (Not totally amazing at this one but we can help!)

AND MUCH MORE!

Before we get into contact here is a simple FAQ:

Whats the site to portforward on my own:

<http://portforward.com/>

Where can I download the latest version of DarkComet:

<http://www.sendspace.com/file/rm6f4b>

Can the Cops track me down:

Yes. Don't make your activities obvious.

Is ratting illegal:

Yes.

=- If this doesn't answer your questions which it probably wont contact using the info below. -=

Skype Dedicated to RAT Support: RatHelp.HF (Recommended)
Email answering long qustions: ermergerd6@gmail.com
Or by PM, PM Me!

We are currently: Online !

Send us a contact request! Don't hesitate!
Our support team is nice and wont yell at you for being a n00b!

Looks good, I hope this helps a lot of other users.

TB128 - March 4, 2013, 10:55 pm

Hi.

I have tried using most RAT's. The file works correctly and the connection comes up. BUT anti-viruses are picking it up even though the file is being crypted...

Help anyone?

Norton has said that the file was removed for "suspicious activity".

Use the Skype/ email above.. or just PM me. I have some nice spreading techniques, you should

also test it to make sure it works, which I can do.

Port forward

I have a Thomson-Alcatel TG787 router and i follow all the steps that appear in portforward.com for this router but in the end when i go to select the device to forward ports, my computer doesn't show up. All of the devices appears but mine doesn't. Can anyone tell me why??
