It's been ages since I've been here, and it seems to have gone to shit...
Anyway, I'm here to inform the Australian users about this prepaid mobile plan.

<https://www.koganmobile.com.au/>

It's 30\$ for:
Unlimited Calls
Unlimited SMSs
Hosted on Telstra's 3G network
6GB of data.

Enjoy!

Of course not. Kogan is a pretty big Australian brand. Thanks for sharing OP. Are you using it?

For people in the US, VirginMobileUSA is a nice choice, will smart phone plans stating at 35 bucks for unlimited Web and Text with 300 minutes you cannot beat it. I cost like 55 for unlimited everything and they have some nice phones.

For this same plan in the UK it's £12 with GiffGaff
