Hey guys, I'm selling the source of my Skype Tool, which I sold under the name Skype Plus.

Features:

Fully written in .NET | VB2012

Spammer with multi grades: Small, Normal, Fast, Hardcore.

Broadcaster, with some configs. (Online Status and Spam)

AFK Statustext

Status Spammer

IP Resolver - Not working anymore, you need to fix it yourself

Use HTML in your Status

You need to add your own HWID System

Screens:

[img]http://i.imagebanana.com/img/rj6ko6su/Unbenannt2.png[/img]

License input:

<http://i.imagebanana.com/img/dhubbrsw/key.png>

You only will get the project for this tool!

Pricing - 10\$

Way too expensive when you consider the fact that this is an exact copy of this german guys video tutorial on youtube...

Just wondering, what makes this better than all the freely available tools with source codes you can copy?

But GLWS anyways...

CoxXi - March 7, 2013, 9:30 am

Is'nt any copy of an free available bot or anything.
