Thread: [\[Hot\] Phone Verification Method for Google/Youtube/Facebook/Any \[PVA Method\]\[8.2/10\]](#)

StuffSneak - March 7, 2013, 1:23 pm

Yes. I am selling a Phone Verification Method for Google, Youtube , Facebook or almost any site.

Introduction and Review

PVA stands for Phone Verified Accounts. Google or Facebook or any such big sites which are massive opportunities for online marketers have this phone verification restriction on accounts. Until accounts are not phone verified, they limit their activities like posting on pages or liking content etc. So PV is really necessary thing for promotion of your content. Here I present you a method to get such unlimited virtual numbers for verification purpose on unlimited accounts.

Method is really straight forward. I have tried to make it a lot easy with screenshots and videos. Hope you wont have any problems.

Some notes:

This is not Pinger/Textnow or sites like it.

This is not Google Voice only method

This is not any iPhone/Android Application

This is unique method.

The quality of information in the eBook is brilliant. The eBook deals with a single method on how to

verify Google, Youtube, Facebook or any other account. The method is explained in great detail with screenshots.

I tried to implement this method but, failed. The site mentioned in the eBook requires manual approval rather than instant email confirmation which I didn't receive in two tries.

Edit: It seems it doesn't send the verification to temp emails. I have tried with AOL it works.

Layout of the eBook was professional. The eBook was well formatted and was easy to read. The screenshots were visible and overall it looked good.

Grammar was spot-on. I encountered very little punctuation errors and run0on sentences.

Unfortunately, the method isn't original at all. I found the exact same method posted on a site which came up on first result when I searched some contents in the eBook.

The only difference between the method which is posted publicly and this eBook is that the eBook explains it with screenshots and in detail. The core method is the same.

Good luck with sales!

The author lays out a unique and efficient phone verification method for any type of PVA account. The reader will not have to do any external research in order to succeed with this method, all the information needed is contained in the guide.

I created 5 PVA YouTube accounts in about 10 - 15 minutes after reading this guide, it was super easy to implement and the author explained everything in great detail.

The layout of the guide is very professional and simple to understand, the author uses an assortment of different fonts, colors and lays out the method step by step for the reader.

Grammar is outstanding, there are few to no errors in this guide and of course nothing to affect the overall understanding of the e-book.

I have never seen this PVA method before and I can personally vouch that it works from personal experience. (Tested)

Overall, great guide on how to create PVA accounts in 2013. Please remember that Google is always trying to blacklist these methods so they cannot be used for their services but as of right now this method is working.

Good luck with sales!

The method worked for me and I received all the emails, that's odd that you didn't.

maybe thats because he did not ask me the question you did before putting it in review :(I updated the book with some highlights for that.

And Thank you both for the reviews guys.

how is this a 8.6/10?

you got a 8/10 and a 6/10

would average to a 7/10.

brian188246 - March 14, 2013, 8:17 pm

Why did you raise your price from \$15 to \$50?

Ulysses S Grant™ - March 14, 2013, 8:19 pm

Not sales Trashing But From Reading The Comments of the Reviewers I believe This Method May be Public !

Not really. I did check after the reviewers comment. It was removed from the source. I did not

actually know about that.

@All,
still selling this. HMU if you want to purchase

Desty - March 25, 2013, 4:52 am

Can I buy one verification to see if it banned from FB Ads or not?

Can country code be chosen? or it's random?

I have sent you a PM

Hope that answers your questions.

quakeon - April 13, 2013, 3:56 pm

I added you about method on skype :)

????????? - April 14, 2013, 10:08 pm

Will this work for eBay?

Will I be able to get a phone number with a certain area code and country?

Do I have to provide real information?

Is this easily repeatable?

Can you help/refund if it doesn't work?

Also, I added you on Skype if you would prefer to answer there. Thanks.
