Wow! This is really cool! Is it vectors? It's a bit boring though(: Too gray i think... 9/10.

1700block - March 8, 2013, 2:13 pm

Why is there koi?

Koi are not eaten as sushi xD

Any how, very nice.

Anal Voyage. - March 8, 2013, 5:59 pm

Thanks for the feedback, guys. C:

It's "dull" 'cause it's only at 75% opacity. I was originally gonna put text on top but I never changed it back.

And yes, it's a vector. :D

@Dr:

It's koi 'cause I wanted to do the swimming fishies. :D

.Alerion - March 8, 2013, 6:01 pm

Wow, this is actually really cool man.

Is there a specific name for this style? I'd love to see more.

9/10

Fireworks - March 8, 2013, 7:15 pm

Your vector work has greatly improved young padawan.

Anal Voyage. - March 8, 2013, 7:17 pm

Thanks for the compliments, guys.

Uploaded a V2.

Hopefully the "dull" problem is solved.

But my lighting is still crap. xD

Fireworks - March 8, 2013, 7:25 pm

On the bowl there should be minimal shadowing. Because based on the lighting from the fish, there is something over head, stopping above light from spilling onto the inside of this. And since the light

is mainly external the fish should have harsher shadows than they do, and since the bowl is in the middle and it receives light from all directions, it should have minimal to no lighting.

Naw, the assumed lighting was from top left to bottom right.

The lighting on the red fish and the sushi should be passable, it's just that I flipped the red one to make the white one so the white one has reversed lighting.

Baghead - March 8, 2013, 8:08 pm

imo this is your best assignment yet

the sushi could use some work but overall it's detailed and well done. A nice change from your usual... ya know ;)

Anal Voyage. - March 8, 2013, 8:59 pm

Thanks bbg. <3

wish you didn't leave. :C
