Introduction

Hi there ,

Anon - BT is a Project Made by XDrone For to Surf anonymously to 20 + Bit Torrent Sharing Websites.

- 1.Are you Worring about your Neighbours seeing what you are downloading and uploading?
- 2.Are you Worring about your Identity?
- 3.You Don't Want to tell anyone that you are downloading from BT Websites ?

and many more ?

Yes, this is the right Post you need to Before investing on any commercial servers/VPN's

Anon - BT will guard your Privacy while Surfing to Bit Torrent Sharing Websites.

First of all you need have Basic Knowledge on VPN ::

A virtual private network (VPN) extends a private network and the resources contained in the network across public networks like the Internet. It enables a host computer to send and receive data across shared or public networks as if it were a private network with all the functionality, security and management policies of the private network. This is done by establishing a virtual point-to-point connection through the use of dedicated connections, encryption, or a combination of the two.

The VPN connection across the Internet is technically a wide area network (WAN) link between the sites but appears to the user as a private network link—hence the name "virtual private network".
