Thread: [by using Wire shark can we find WPA or WEP ?](#)

premh - March 12, 2013, 2:55 pm

how can we use wire shark to get the WIFI password of neighbour ?//

Pinkie Pie - March 12, 2013, 2:57 pm

I don't think you can with wireshark.

I'm sure there's a couple programs out there you can use which will spend time scanning packets from the network which will eventually crack the Wep key.

I think WPA is much harder to crack and your best bet would be some sort of bruteforce.

premh - March 12, 2013, 3:03 pm

Well if I am in LAN, can i use wire shark to see the chat conversation? if so how can we sniff it??

Turtle™ - March 12, 2013, 3:36 pm

I'm pretty sure that you have to already be connected to the network for wireshark to work which would mean that it's useless for actually cracking the password. You are better off trying to brute force it.

Someone correct me if I'm wrong.

Alpha The Hunter - November 1, 2015, 9:52 pm

premh

you can crack wpa/wpa2 wifi passwords by aircrack it is not really hard. It will be best if you run aircrack-ng in kali latest. For this attack you just need Kali linux and a compatible wifi adapter. If you are interested in this attack mail me at shirsendu2001@gmail.com

Thank you
