1.5 Update:

Changed user agent to youtube app, and changed the refresh interval to 20 seconds instead of 10..
due to proxy issues.

This does not work. It gives me a error every time

AtomicGaming - April 7, 2013, 5:02 am

I've coded a similiar bot in VB.Net so i know the code,still nice piece of work there! ;)

We should add a way for bot to know if proxy is not working,so it automatically skips to the next one.

Dunno how long it takes, depends on the proxies

If the video doesn't play back, then that means either your antivirus may be conflicting with the bot, or the proxy it is using is too slow/not working

You fucking imbecile think that proxies grow on trees? To really "boost" your views you'll need thousands of proxies. And how you get the proxies that aren't A) slow as fuck B) not ones that everybody knows and uses thus making it to easy to blacklist them.

Your bot is like a car without gasoline ...

Free because I was going to make a paid version, but that would mean I would have to support this project more and work as fast as possible for updates, whereas if its free, I can choose to update it when I have time to. I can upload pictures, but been busy [schoolwork etc], Maybe when I get time

1. I decompiled (to see if it was crypted)
2. + I ran in sandboxie, and it worked
3. + I ran normal, closed it, and no extra processes were made/were there.

Do not download this, he has a virus in the files!

Mromandxp - June 30, 2014, 10:22 am

idk how to get this 'proxy list'...

Server97 - June 30, 2014, 11:16 am

I suggest you DO NOT download this!

As other users have said this seems backdoored reasons:Hardly any ub3r/l33t vouches

User is new

Hi

Error: "please paste a valid Youtube video URL"

https / www and no www were all tried ...

???

ALSO

WHERE / HOW do you load the proxy list??
