Thread: [Remove the part that removes repeated numbers](#)

Charger - March 15, 2013, 12:42 pm

It is very annoying especially when you are using colors.

Ex:

I make this text #6 6 6--6-|6|6 color.

When you do it, it makes it break and drop down to 66

[color=#66]Testing[/color]

I don't see any reason to have it auto remove repeated characters.

Why the hell would he continue to use it?

Because members use dem numbers to spam and evade 35 char limit.

They have this implemented to stop Low Quality users from spamming threads with nonsense. Why even make a thread complaining about the sixes going away when you are looking to color something anyways, no one will see the characters and there isn't a hex code for it anyways?
