Thread: [\[TuT\] How to spread your RAT/Keylogger \[Pictures Included\]](#)

?lex - March 15, 2013, 1:20 pm

Okay, I decided to share my way to spread a RAT/Keylogger.
For my first method, I'll use Facebook/Omegle/Chatroulette.
IMPORTANT: Make sure your crypter is FUD or 1/35 else you'll be caught!

1. Extension Spoofer

In this case, I'll be using the Dark Comet built-in extension spoofer.

-Open up the spoofer and select your file:

[img]http://img443.imageshack.us/img443/786/91070368.png[/img]

My new file: Sexe.jpg

I have chosen S as a filename because it's less obvious. You can choose any name.

What we want to do now, is, we should change the icon.

If you're using a good crypter, there's an Icon Changer feature built-in there.

In my case, I've crypted my file with my newest W.I.P Crypter. ACrypter.

So, my final file:

[img]http://img248.imageshack.us/img248/175/sdsdsun.png[/img]

Now, the spreading part.

Head over Chatroulette.com/Omegle.com and/or Facebook.com

and act like a 16 years old horny teenager.

"Hey, I'm a 16 years old female from the US, wanna see me horny"?

Or, something like that, I'm sure you can come up with something better.

I've got 5+ slaves in less than 20 minutes.

2. Youtube

You can also use this method on Youtube.

1. Make a fake youtube account.
2. Post a Justin Biebs song.
3. Spoof the extension to .mp3
4. Choose a good name, so they won't notice it.
5. Put a download link saying that that's the song included in the video.

Example:

[img]http://img692.imageshack.us/img692/4409/justp.png[/img]

NOTE: I haven't tried this method yet.

3. Forums

Let's make it clear, by forums, I don't mean spreading your RAT on Hackforums.

Head over some popular forums like:

<http://hardforum.com/>

<http://forums.somethingawful.com>

I don't remember any more popular forums, feel free to search yourself.

So, once you get a decent forum, start a new thread saying that you're giving away your GAMEHERE Generator for free. I'm sure many kids will fall for this, as I used to do, when I first started this.

4. uTorrent

This might be the best method since you can get a lot of installs per day.

-How to make a torrent?

Open up your Torrent client and go to> File> Create Torrent;

That's all? Well almost. All you need to do now is put in the tracker info and tick some boxes. This can differ somewhat from client to client but it all comes down to the same thing.

Trackers: This is probably the hard part for most people. But it's pretty easy, just put in one of the popular public trackers. You can use one or more trackers, but in general one is enough.

Put one of these in the trackers box.

<http://open.tracker.#.org/announce>

<http://www.torrentdownloads.to:2710/announce>

<http://denis.stalker.h3q.com:6969/announce>

udp://denis.stalker.h3q.com:6969/announce

<http://www.sumotracker.com/announce>

Note: Don't check "Private".

Done. Share it with your friend and/or upload your torrent on any torrent site. Name it something like:

PayPal Money Generator 2013 Working/Fixed

5. Facebook

This is not a guaranteed way, but will work if you have some fool friends.

Make sure your file is crypted very well, and send them this message:

"Hello, Mark Zuckerberg is going to deactivate the inactive accounts, to prevent this, please download the Facebook Activator. [URL HERE]

I suggest you to upload your files to virushost.ws

And shorten them with gg.gg.

I've got some slaves with this method.

Anyway, this is a basic example:

[img]http://img585.imageshack.us/img585/7743/72616149.png[/img]

There are a lot of tutorials on how to spread your virus.

I hope you like mine.

If you have some additional questions or need some help, feel free to PM me. ?

Revcode - March 15, 2013, 1:24 pm

Nice tutorial. But why Mediafire? Not recommended.

?lex - March 15, 2013, 1:25 pm

This is just an example, I don't own that picture or song.

I suggest uploading on virushost.ws and shorten it with <http://gg.gg>

Revcode - March 15, 2013, 1:28 pm

(Mar 15, 2013 01:25 PM)Alexinjo Wrote: [CITE](#) This is just an example, I don't own that picture or song.

Okay, my bad. Nice methods.

- Cheers!

Tutelary - March 15, 2013, 1:34 pm

Great tutorial, though I don't agree with extension spoofing. It just makes it look more suspicious imho.

?lex - March 15, 2013, 1:50 pm

(Mar 15, 2013 01:34 PM)Lakai™ Wrote: [\[CITE\]](#) Great tutorial, though I don't agree with extension spoofing. It just makes it look more suspicious imho.

The only bad thing is the "exe" in the filename, that's why I suggested using the word "S", if you know what I mean. ? ?

Happy Hacking. ?

?Schock - March 15, 2013, 2:41 pm

cool tutorial it might be helpfull :p

Joseph Ducreux - March 15, 2013, 2:41 pm

Don't upload on mediafire, unless you have it zipped. Try ge.tt instead, then I shorten it with goo.gl.

yo9517 - April 4, 2013, 12:54 am

Got a good direct link hoster for you guys :P

<http://www.webgel.net/bb/>

Atharva - April 4, 2013, 3:39 am

Simple but good tutorial.

Thank you !

89dogg - April 4, 2013, 4:10 am

nice tut. thx for this spreading methods...

?lex - April 28, 2013, 8:04 am

Thank you for your kindness, I'll write a better tutorial soon.

Business - April 28, 2013, 8:06 am

(Mar 15, 2013 01:34 PM)Lakai™ Wrote: [\[CITE\]](#) Great tutorial, though I don't agree with extension spoofing. It just makes it look more suspicious imho.

Agreed. If you are good at making your S.E convincing enough for them to download, who cares what they think it is.

Erin - August 10, 2013, 10:00 pm

The extension spoofing worked great for me. couple of kiddie gamers on skype, told them to pass it wround, but the "sexe.jpg" was too tempting and they opened it. haha great tut.

jamesmartin1879 - August 11, 2013, 6:29 am

Thanks for this, im new to all this so will help me a lot! Thanks mate!

alphabres - August 11, 2013, 6:34 am

Simple but good tutorial Thank you ..!

El_Panos - August 28, 2013, 8:14 am

What about to spread the rat as pdf file?

Panayotis

Tidligere - August 28, 2013, 8:42 am

Nice tut, It will be helpfull for alot of people
Thanks!

Tigas2010 - November 23, 2013, 12:09 pm

Nice tut ;) Thank you and keep up the good work!

Viagra - November 23, 2013, 12:49 pm

Really usefull, definety going to try some of these! Thanks :)

The.Repeater - December 5, 2013, 10:00 am

good tutorial bro, thanx 4 ur time . . .

BucketSec - December 20, 2013, 11:47 pm

Thanks man!

Could you upload the ico file?

And do you bind a actual jpg?

If not don't you get caught? Thanks again!

?lex - December 21, 2013, 1:18 am

(Dec 21, 2013 12:47 AM)razertim Wrote: [\[CITE\]](#) Thanks man!

Could you upload the ico file?

And do you bind a actual jpg?

If not don't you get caught? Thanks again!

There are plenty of image icons online, search for them yourself.

Example (image icon.ico)

You won't get caught if you know what you're doing.

FSB-MaSTeR - December 21, 2013, 3:36 am

Cool, useful method Thanks for the tutorial

Netviper - December 21, 2013, 11:31 am

Thanks for the tutorial, have to try

overdead - December 21, 2013, 12:58 pm

Massive gravedig guys... But with that said, this is a great spreading TuT and I'm sure it will help many people.

Chief Keef™ - January 7, 2014, 7:23 pm

Nice! And why is mediafire not recommended?

Royal Bash - January 11, 2014, 4:12 am

#Bump because of this good tutorial and it is really usefull for other people!

fabiomcferreira - March 24, 2014, 6:09 am

Thank you for sharing all the methods

smokenshaddyx - April 2, 2014, 10:33 am

i always use box.com to host the virus

Windows - May 4, 2014, 11:23 am

If you post it on Minecraftforum.net and name it as a Minecraft gift code generator or something alot of kids will fall for that

JaGLY - May 4, 2014, 12:36 pm

Great tutorial buddy i would just remove the mediafire thingy :) ?

Cammy - May 4, 2014, 3:00 pm

Thanks, bookmarked this just in case I'll ever need it.

Kykysa - May 4, 2014, 4:07 pm

Yea pretty good Tut. The part about the spoofer. I like to add 'Songname-Ann' as I tend to bind my stubs to mp3's, and it will come out as Annexe. Then say it was recorded at the Annexe. Since Annexe is a real word this can often fool a few of the more cautious folks out there.

Vladmir Putin - May 4, 2014, 4:31 pm

one those chat sites you don't need to be 1/35 people are so fucking stupid they think .jar = .jpeg lolol

Kykysa - May 4, 2014, 4:44 pm

(May 4, 2014 04:31 PM)Vladmir Putin Wrote: [\[CITE\]](#) one those chat sites you don't need to be 1/35 people are so fucking stupid they think .jar = .jpeg lolol

I don't know whether to laugh or cry. When I first started using the internet the only people there where techies and hackers. No www. Archie, veronica, gopher, ftp and telenet where the staple. I'm glad to see how much tech has spread, but at the same time its depressing to see the lack of common sense and carelessness..

Not hating on your post, you are completely right. I just get amazed sometimes at the lack of people using their brains.

dragonlord6 - May 4, 2014, 5:17 pm

great tut well done very usefull going to give it a try

BestHacks - May 16, 2014, 5:26 am

The trackers are outdated, are you updating them anytime soon? thanks in advance

Green Death - May 16, 2014, 10:29 am

thx for that tutorial.

I think Torrents are the best (and the faster) way to dispatch your Rat / other stuffs.
Pr0n is the best.

Triology_ - May 16, 2014, 12:21 pm

Thanks for the understandable tutorial, love you !

1024KB - May 17, 2014, 11:19 am

Thank you for these tips good explained

BySnakePrime - May 19, 2014, 4:11 am

Smart of you using S lol.Thats a very good idea.

quinlan3 - May 28, 2014, 6:45 am

Another Way Is To Hack A Website However easy ways : bruteforcing ftp telnet ssh etc exploiting those services will work to download metasploit from www.metasploit.com it comes with exploits bruteforcing etc its a great tool

Mad Panda - May 28, 2014, 10:17 am

Great tutorial !

Please update the trackers for 2014 or add some new/best ones

Nikem.D ? - May 28, 2014, 10:49 am

Nice tutorial .

it will help a lot to people who don't have proper info .

Regards

Nikem.D

(May 28, 2014 06:45 AM)quinlan3 Wrote: [\[CITE\]](#) Another Way Is To Hack A Website However easy ways : bruteforcing ftp telnet ssh etc exploiting those services will work to download metasploit from www.metasploit.com it comes with exploits bruteforcing etc its a great tool

LoL .

What is it ??

WarrEagle - May 28, 2014, 11:57 am

Thanks man, this is just what i was looking for. Now to put it to use.

?lex - May 28, 2014, 1:26 pm

Guys, this thread is old, and the torrent method probably doesn't work anymore. You can still use some of the methods, though, but even they are highly saturated. I'll update it when I'm free!

Thank you all for the nice comments.

Brule - May 28, 2014, 1:29 pm

A little simple, but should be very helpful for those who wants to start out with spreading their file.?

Dist - August 25, 2014, 10:42 pm

Awesome methods! I need to know what is the best file sharing websites?

alesiox94 - September 3, 2014, 12:11 pm

someone know if i risk to finifh in prison?

Alterations - September 6, 2014, 4:48 pm

Thanks GREAT tutorial! I owe ya man! Cheers!

BlazinPenguin - November 3, 2014, 3:55 am

Nice Tut! Thanks for the easy to understand info.

KingMidas - November 3, 2014, 4:08 am

Thanks for this. Well written and easy to read!

Keep them coming!

picslamc - November 4, 2014, 1:37 am

picslamc - November 4, 2014, 2:47 am

[quote='Lalit Agarwal' pid='43168046' dateline='1415094387']

Hey , i tried it but i cant make it :/

WOLF3 - December 4, 2014, 5:03 pm

What hosting site is recommended? I am trying out box but... idk

memanolz - December 4, 2014, 6:14 pm

This is a pretty sick tutorial thx man i love it, if only i could find a JPG icon somewhere....

kloresies - December 4, 2014, 6:27 pm

Spoofing looks more suspicious.

If you want to try pass it off as a picture file, use the .scr extension and just use the windows picture viewer icon. More people fall for the .scr extension confusing it as an image format than they will a .jpg.exe extension.

Spoofing is pretty pointless. Requires a truly stupid fucker to fall for it.

If you want to find the picture viewer icon, just search into google, windows 7 original icon pack, there is a few on deviantart.

Other than that, great guide OP.

TerminalLance - December 5, 2014, 1:17 pm

how can you make the .exe to go away?

Trinca3333 - January 8, 2015, 2:56 am

thx mate,i think this is the best method i have seen

Sogomn - January 22, 2015, 1:29 pm

thaats a cool idea but unfortunately my program wants to copy itself to startup folder and it doesnt work when the spoofer adds those weird inverted letters to the filename

Yushhhhh - January 24, 2015, 8:54 am

Thanks for this man this is amazing. Can't wait to try it out.

acc3r - January 24, 2015, 1:49 pm

Really good tutorial, thank you mate!

SuNSh1N3Z - February 18, 2015, 2:19 pm

Thanks for sharing these methods, defenitly going to use some of them :D

Relief_ - February 18, 2015, 11:21 pm

Thanks! I will have to try some of these...

iHasSlowInternet - March 21, 2015, 9:19 am

Thanks for the tutorial! I can't believe I didn't about fooling people on omegle before lol
