These ones are vb6. Most of crypters are made in VB6, btw. ?

DarkFalcon - March 25, 2010, 3:01 am

Thank you so much, now I can make a VB6 crypter by examining the codes...?

Does that mean VB6 Crypter is better then Vb.net?

It is the same.

The difference between VB6 and VB.NET is VB6 uses .OCX files, VB.NET requires .NET Framework.
