Who is we?

Me and Libx is we

Its a very long story but it must be shown Hackforums that User putting our cash in Danger, I got to rewrite this cause he like DDosing me, so I had HTTP Error. It all started that I was looking for 40\$ Exchange with Disfigure, it was pretty hard to find someone to exchange us. We saw that Shocking Swag had a Thread, he does an Exchanging Service. Looked all nice he had 0 Negative, or Neutral and had some awards. Ok I added him in Skype and asked him if I can invite Disfigure, he agreed with that so I invited him. And asked him for his HF and so on we went straight to business cause we don't want to waste much time. I sent him the money he accepted it and suddenly saw that I aint US verified cause I dont live in the US thats so obviously that I cant be US verified.

So he refunded us and I wanted to send to Disfigure and Disfigure to Swag cause Disfigure is US verified. But he didn't like our offer, he said we are fishy. We posted the true below his Thread that if you aint US Verified you can't exchange. Five minutes later he said its fine he will exchange, ok then I told him I will resend it now, so I sent him the money, and then he went AFK for 2 hours he said he went offline but he was online all that time. Disfigure - Reped him and posted under his Thread that we got scammed. There he came again and said he is back, then he told us his Inet was gone for 2 hours which happens right after I send the money. He told us he will exchange now and everything is fine, I closed Dispute and thought he is sending then he said Disfigure fucked it up, I think he saw the - Rep. Since then he is refusing to refund, we made plenty of offers to get that money back, no chance. I think he spent that money for ddosing us.

Disfigure = me

Antonio = Shocking Swag

hmm = Libx
