pretty good results with blackshades for a free crypter :D

thanks for the share

btw does it have startup integrated or do i need to enable it in the rat? (Mar 17, 2013 02:47 PM)

Thangorn Wrote: ([CITE](#)) Just should like to point out, I tested it through and thorough, legit nice crypter! not completely FUD as previously mentioned however it's a perfect crypt nevertheless

Nice to see some new guys giving it a go at making crypters! Keep up the great work dude ?

Vouch for this crypter, just don't scan on VT and it will stay relatively undetected

Very suspicious, scan on VirusTotal. If it comes clean its a virus. If it detects as a dropper, its clean.

Zhyper - March 17, 2013, 6:39 am

Ok Sure Bro, uploading in virus total now

Scan of the Program

Is it supposed to look like this? And why don't any of the features work? Just curious..
When i crypt my server it turns it into a unidentified file.

TheBlackWalker - March 18, 2013, 12:26 pm

I'm not sure if I'm supposed to do this or not, but, if you need help decrypting the password, read this:

<https://hackforums.net/showthread.php?tid=3330260>

It helps out alot! Helped me! ;)

I crypted a test file and scanned it with Avast. It came up clean. I scanned with comodo and came up clean. So far, I like it. I'm scanning on ES and I'll post the results to that here soon!
