So the JDB is not working, he said right after the payment that he scammed me , wich i can't verify if it's true or not as the JDB isn't working and is copied from ari..(i don't remember)..bot JDB wich was posted by a HF member in hack tutorial section. Then he said he would crypt the files for me but uh then ask for 4\$? . Then the domain name. same thing asking for 3 extra \$?..

Do not deal with this guy !

If he admitted to scam, send that screenshot to staff that will make him banned.

I can verify it's a legit scam report. It's disappointing how ub3r's think they can take advantage of normal members.

MasterCurser - March 18, 2013, 4:01 am

Says he will get a .com domain. Gives a subdomain. That is where I leave reading already.

Europe - March 18, 2013, 10:20 am

Hey guys, i'm really dissapointed in what i see.

This user has clearly got everything he payed for in the package.

He is also lying hard about the .com domain, i told him before he bought a package, that the .com

domain is my domain.

He did not notify me about opening any scam report.

If anyone wants to see a JDB sold by me, just hit me up.

Also, i can get some of my customers to confirm that their JDB is working.

[EDIT]

Apparently this user is right, without my knowledge my .com domain got blacklisted 2 days ago. The strange thing is that the domain is working for me.

Buying a new domain now.

BottleOWater - March 18, 2013, 10:36 am

Stop the manipulation Europe! Now that i've done that i don't need to pay extra 4\$ for a domain? you're changing your words over and over again , on skype you even told me just now that you said before i buy this that i would get your domain , sorry you never said that even the picture show this.

Europe - March 18, 2013, 10:45 am

Nope, i'm not changing any words.

Also you did get my domain. It just got blacklisted without my knowledge.

But here, your new domain is up and ready.

[EDIT] Problem between me and this user appears to be solved.

In the end the only problem was my domain didn't load, because it got blacklisted without my knowledge.

Did you really have to open a scam report?

BottleOWater - March 18, 2013, 12:41 pm

hmm.. ok im done ! -- i guess you're having another scam report
