What sets this apart from all the others RATs?

Not trying to be mean or anything, your description is just very basic and doesn't set this apart from your competition.

Dreadful - March 19, 2013, 10:00 pm

I'm officially the first poster in this thread, and I approve this message.

EDIT: Now I look stupid.

@The user above, each file is FUD and unique with constant updates.

TheEnd-cR - March 19, 2013, 10:01 pm

Hypersnap... as in... screenshot... software? holy shit OP

inb4 remote

Anoptic - March 19, 2013, 10:19 pm

So I just got this and I gotta say it's pretty fast, and with these future updates coming I think this program will give people like BlackShades and Paradox a run for there money.

Thank you for the copy Percieve ;)

Ecatel - March 19, 2013, 10:22 pm

Vouch for user, the product is high quality and very, very reliable.

Laxzor - March 19, 2013, 10:41 pm

Tried to Purchase and it didnt work -_-

DeadLine - March 19, 2013, 10:51 pm

Looks interesting, but you should take some screenshots with this thing:

<http://screenshotr.net> it doesn't add a watermark or anything <3.

Start > All Programs > Snipping Tool

>imgur

What language is it coded in? Also, what the hell is a thrift shopper? Feature list seems pretty bland.

Thrift Shopper plays Thrift Shop by Macklemore at 100% volume and loops.

Invicta - March 20, 2013, 1:13 pm

Working on a load of new features. Will release the 0.2 update within the next 2 hours.

Anoptic - March 20, 2013, 4:45 pm

(Mar 19, 2013 10:41 PM)Laxzor Wrote: [\[CITE\]](#) Tried to Purchase and it didnt work -_-

Well maybe if you weren't carding it, it would work.

Invicta - March 20, 2013, 7:22 pm

Update 0.3 Added Features:Messagebox

Proactive Defense

Malware Remover revamped

Anti-Task Manager

Kill Process by Name

Bug fixes:

Thrift Shopper minor update

SHADOW REALM - March 20, 2013, 7:24 pm

Does this have a webcam viewer? And can you list some more features?

Invicta - March 20, 2013, 7:35 pm

(Mar 20, 2013 07:24 PM)SHADOW Wrote: [\[CITE\]](#) Does this have a webcam viewer? And can you list some more features?

Not yet. I'm working on it. Hopefully will be in the next update.

More extra features:

Installation path protection
Process protection
Registry persistence
Set reconnection delay
Unique build generator

The most stupid thing I have ever seen. I was about to purchase but then I seen that and it makes me think this is not a serious project.

More or less it was in there as a joke. I'm probably going to remove it soon. And this is a serious project. I spent 4+ hours on it today.

Still didn't answer my question.

Add some decent features and not functions that already should be in a rat and you'll get some customers.

C#.

What features would you suggest me my man?

"Prt scrn" button on your keyboard.. while holding "shift" to only SS the active windows.

Does this have remote desktop, webcam/screen stream?

Invicta - March 21, 2013, 7:57 pm

Yes it does. Webcam is being worked on man.

Nautica. - *March 22, 2013, 12:21 am*

Vouch. Smoothest Remote Desktop I've seen yet.

Invicta - *March 22, 2013, 7:45 pm*

Next update will include a Ruskill function.
