Thread: [\[TUT\] How to Resolve a IP \[Noob Friendly\]\[Links included\]](#)

?1???po?N? - March 21, 2013, 4:15 pm

Hello, in this tutorial i'm showing you how to get a Ip-Adress, this tutorial is for beginners who don't know how to resolve ip's.

This is one of my first tutorials so it's not big or good quality but i hope you enjoy it!

1. Website Ip's:

Step 1: Open up CMD (command promp)

Step 2: Typ into ur cmd: "Ping [www.yourwebsitehere.com](#)" It will ping back the ip and you are done!

Spoiler [\(Click to View\)](#)

2. No-Ip ip's:

No-Ip ip's are used for RSPS and other Game Server Hosting.

This works the same as Website resolving.

Step 1: Open up CMD.

Step 2: Typ in ur cmd: "Ping blabla.no-ip.biz" It will send you back the ip and you are done!

3. Skype Ip's:

For this way you need a skype resolver, here some free skype resolvers:

[# Resolver.](#)

[Timmar Resolver](#)

[CyberFelix](#)

First you need someone his skype name, to get this just right click on your victim and click on "Show Profile" Now a window will pop-up wit also a skype name in it, Typ this skype name in ur Skype-Resolver and you get the IP ;)

Spoiler [\(Click to View\)](#)

4. Steam Resolving.

For this way you need a Steam Resolver, i'm using the steam resolver of: [OnionStresser.](#)

The only problem is: As far i know there are no free steam resolvers :(

Step 1: We need the steam ID first, to get this we use [SteamIDFinder.](#)

Step 2: Open someone his steam page and paste it into the SteamIdFinder (The link will look like this: "http://steamcommunity.com/profiles/12345678") , Now their steam ID will appear, copy it.

Step 3: Just put the steam id into the resolver and you resolved the IP.

I hope this tutorial helped some of you out! If it helped you, a "Thanks" below will be great. ?
If you see grammar fault please PM me and i'll edit it, English is not my best language ?

Nice tutorial, but I can't help but think I've seen this around before.

Are you the original author?

Lev (???) - March 22, 2013, 7:52 am

This was a nice attempt
Good job mate...

JaggarN™ - March 22, 2013, 7:55 am

You dont need a "steam reslover" becouse all the steam reslover does is google the steam id and looks for bans and in the bans its often a ip to the banned person

Mapple - March 22, 2013, 10:42 am

Very nice tutorial, keep up the good work!

SONY123 - March 22, 2013, 11:28 am

Nice Tutorial, hope more tut from you for us ;)

It can be they use a "Proxy" or something on their skype, it can also be that they bought that they can't get finded, for like 1\$ sorry for bad grammer :\$

Someone got a suggestion for my next tutorial?

?I???po?N? - April 11, 2013, 11:58 am

Whoops Double post sorry
