Thread: [Exploit for kernel 2.6.18-274.12.1.el5 \(x86_64 / 2011\)](#)

Kirk_sv - March 21, 2013, 4:53 pm

Hi guys.

Anyone know an exploit for this kernel version?

uname -a: Linux xxxxx 2.6.18-274.12.1.el5 #1 SMP Tue Nov 29 13:37:46 EST 2011 x86_64

I tried this: <http://www.1337day.com/exploit/description/18859>

But no work :(

n3xus - March 21, 2013, 6:06 pm

That exploit is for kernel 2.6.29 and higher (2012 kernel). It is coded by zx2c4 by someone ripped it and submitted to 1337day claiming that it is for kernel 2.6.18-374.*.el5. They even forgot to remove the credits to the actual coder.

Oh thanks, i didn't know about it.

Then.. exist an exploit for this kernel?

I tried this: <http://oco.cc/root/> (2.6.18-274-2011)

But neither works :(

Ps. Sorry my bad english.
