Thread: [\[Free\]\[L33T-UB3R Only\] Spotify Premium Codes Cracker \(With Sources\)](#)

OwnIt - March 24, 2013, 5:39 pm

Hello every beauty,

There are still few minutes, I wanted to sell this code on the HF's market.

In fact I think it would be better to share the code with the L33T and UB3R.
Yeah. And you know why ? Because I love you guys. ?

This cracker is coded in Ruby, and is very fast.
Option : when starting the program, you can choose number of threads.

What you need to use the program :

Quote:-A server (VPS is enough, or your computer if you have a good connection)

-An account on DeathByCaptcha

-Buy 1000 captchas (1,39\$) for ~20 cracked codes

-Ruby installed with DeathByCaptcha API

(https://rubygems.org/gems/death_by_captcha or IF DON'T WORK this :
<https://rubygems.org/gems/deathbycaptcha>)

just MP me, I will send you the program and source code

Just sent you a PM ;)

MP? What does that stand for?

turhanen - March 28, 2013, 5:48 am

i have Ruby installed with DeathByCaptcha API and how i now use this your program can someone explain

OwnIt - *March 29, 2013, 11:56 am*

command : run "numberofthreads"

example : run 12

WebmasterDeluXe - *July 27, 2018, 4:07 pm*

OwnIt i can show you how your toll will work without captcha. why waste money if not needed...
