Thread: [Fanta's Install Shop BTC / LTC / WMZ / PP / WU / .03 per Bot | Filterable options](#)

FantaŠec - March 24, 2013, 5:55 pm

Welcome to Fanta's Botshop

I am selling installs and accept the following payment methods: LTC, Bitcoins, WU(On big orders) and Paypal

Prices: Minimum order = 5\$ if paying with Paypal, BTC, or LTC.

.03 per install

100 - \$3.00

200 - \$6.00

500 - \$15.00

FAQ:

Can you crypt my file? No, I do not crypt.

Do you do test installs? No, It is your responsibility to make sure your .exe is fud and working, I only send once.

What is the Difference between installs, updates, and loads?

Installs: A simple download and execute off of my botnet

Updates: A download and execute then removed from my botnet

Loads: Straight from an exploit kit doesnt hit my botnet

Terms of service:

Your bin must be FUD as I will only be executing once. You must not botkill and cannot chargeback on Paypal. You are paying for how many I execute not how many you receive.

Filtering options below:

.NET only bots

Bots with NO Antivirus

Bots with specific AV's

Bots With Steam, Skype, Minecraft, LoL, Runescape, etc.

Bots with admin priviledges

Bots with 32 bit or 64 bit or both

and I can separate by OS

Most of these options cost a little extra, we can disuss that in PM.

CoppershelldonExcuse me sir, Buying loads and reselling from someone is completely different, a lot of people buy loads off of other sellers because they do not have traffic sources or exploit packs, infinity has bought loads off me, so has fanta, it means that he runs traffic to my exploit kit and he gets the bots, not me so there is nothing actually wrong with this, it's still just his bots.
