BIOTECH'S FILE SPOOFER, FILE BINDER AND FILE PUMPER

Old thread with just the spoofer:

Spoiler ([Click to View](#))[???\[FREE\]Biotech's Extension Spoofer \[Direct Link\] ???](#)

<https://hackforums.net/showthread.php?tid=3110389>

I have discontinued my old thread to reopen a new one which will be for this new application and updates permanently. The old spoofer is still available and always will be just in case you don't want the extra features.

I am releasing my new version with a file pumper!. I am going to be redesigning the entire thing at some point to make it more professional!.

My original idea was to add a icon changer but I still haven't gotten around to it.

Credits go to Vamprrr for his tutorial as I wouldn't have been able to code it.

I have gone on his tutorial and optimised his coding but I made it compatible with his stub so every one has the benefit of making it fud them selves. [Click Here](#) to visit the tutorial

The stub registers as a false positive but if you are in doubt please use the tutorial and compile your own just make sure this is the same Const FileSplit = "77150"

Credits also go to a lot of people on hf who made the tutorials for the file pumper it helped me understand it better. I can't just pin out one and say I learned it from him/her I took bits of them all etc. and coded it my way.

If you enjoy this application please say thank you!

Features

-Spoofer

- 1) Spoof with any extension you like.
- 2) Spoof reverse the file extension only.

-File Binder

- 1) Bind any 2 files together.
- 2) Create your own stub.

-File Pumper

- 1) Make a file larger
- 2) Select B, KB, MB

Requirements

Microsoft .net Framework which is available here: <http://www.microsoft.com/net>

Builds

25/03/2013 - Update - Spoofer v1.0.3 - Binder v1.0.0 - File Pumper v 1.0.0

//VOUCH , thankk you very much man
Always helping me :D

HFBlaz3r - *March 28, 2013, 9:53 am*

virus scan on the thread would be nice .. anyways i'm going to try it

biotech - *March 28, 2013, 1:33 pm*

I removed the virus scan and as it is clean the only thing that is a false positive like I said was the stub which I did say you could build your self.

I will add a VT scan none the less. Also don't forget YOU can also virus scan it.

HFBlaz3r - *March 28, 2013, 1:50 pm*

i like the file it works its clean and its legit thanks for it

c-o-r-r-y - *March 29, 2013, 3:05 pm*

if i knew how to vouch. i would

biotech - *March 29, 2013, 3:06 pm*

You just vouched, I hope you enjoy it :)

Philx - *March 29, 2013, 4:51 pm*

Love this tool thanks really nice and helpful!

Lolland123 - *June 9, 2013, 11:58 am*

It's a virus, here is the proof

biotech - June 9, 2013, 12:06 pm

Firstly it isn't a virus, I did mention the Stub.exe is registered as a false positive and if in doubt rebuild it. Secondly try looking at my pasted scan results on the bottom of the thread and if you doubt it then please go off and scan them your selves.

So get your facts right I take insult to false accusations.

T a n k - June 9, 2013, 4:11 pm

Very useful program! I really enjoy the CMD like design you gave it.

biotech - June 10, 2013, 3:56 am

I am glad you like it! I will at some point do a complete redesign and add a few more features.

KazerTheAmazer - June 10, 2013, 8:19 am

Hi, I received an error from # "This file has been made available to the public without permission. As this violates to our Terms of Use, the file has been deleted by our Anti-Abuse Team." is there another method to downloading the all in one? I would love to add this to my collection.

biotech - June 10, 2013, 8:20 am

I will readd it. Some one probably got butt hurt and reported it so I will upload to another site for every one :)

The file has been updated thanks for letting me know.

Really cool spoofer, good job! :y)!!!

EmmDude99 - June 14, 2013, 4:12 am

Works very well but looks very unprofessional if you know what I mean. Try to make your GUI as

neat as possible.

Underworldproblem - June 14, 2013, 4:51 am

thanks man it works and is great,

but, can someone explain to me stub

Don't be un greatful I do have a new design but personally if you don't like the GUI tough dont use it

Also the stub is for binding 2 files together you can make the bind fud by rebuilding the stub.

Also what's the problem with downloading?

Xercasia - June 14, 2013, 6:33 am

Does this work 100% without any viruses or malware???

I was just saying you should improve it! It's a good program and all, Sorry if I offended you or anything, because I didn't mean to, but I would take something like that as help with the program.

I work very hard to make my things look good, because I personally think the GUI is usually a big deal in programs.

Just like nilsie said:

Can't handle neutral criticism? He is suggesting you improve your GUI and there is no need to handle such a situation in an immature way and -rep him for it. If you can't handle this kind of criticism which is actually just a suggestion, don't post.

Another spoofer software to test out, nice share, keep up!

masteryodax - May 14, 2018, 9:17 am

super bir prgram bro thx

devamini bekliyoruz yeni versiyon çıkacakmi

biotech - September 13, 2018, 3:17 pm

Just a brief update over the next month or so I will be reuploading my latest version. I have been in active due to life but the downloads still work which is great!

Also later then never a few replies for the people who keep saying nice try it is a virus.

If you read the thread it tells you that the stub is a fale postvie because I never made it FUD, I made it so others could!

If you take out the stub you can just delete it then give the aio a scan and it wont have a virus but remember that your taking a feature out of it by deleting the stub.

Also if any one wants a feature added to the new aio please do pm me your ideas and I will see what I can implement.
