I have bought it from the old seller and never worked: giving Reboot.X™ a chance since He said me he bought the source code and He had fixed it :)

Let's see :)

DarkSwag - March 26, 2013, 12:41 pm

let see if the new owner can do something better with the source ;)

Lets hope they fixed something this time around.

IanConnor - March 26, 2013, 2:09 pm

I highly doubt the new owner can buy the source code, and fix every broken function in less than 2 days.

But we will see.

Well, Reputation Abuse: Reboot.X™, Affiliate opened.

I can't understand how is it possible that an user went scammed, trolled and then reputation abused... unbelievable.

Lost money, lost patience, lost time.

Report them to Judge.

If you are right Judge will take care of them.
Doing this to you makes all three of them LOSERS!!

I would like to point out that 4 out of the 5 scam reports/community alerts linked in your thread are made by you... I would also like to point out that none of these concern the current owner of the worm.

You don't know the entire story and I wont open another thread regarding this: Reboot.X™ should be the new owner but there's no update at the moment.

Yesterday I have reported to him that, on other forum, someone trying to sell source code oh MW 3.0 and today I'm repfucked ?

So, let me understand: I have lost my money, I was trolled regarding the functions of the tool, I'm waiting for Reboot.X™ to release new version, report here that someone is selling the source code in other forums and.... I was repfucked ?

Really ? :D
