Ivvan - March 26, 2013, 2:15 pm

anyone test it ? it works and safe?

Grizzpo - March 26, 2013, 2:17 pm

Work, safe, xp/vista/7/8 32 and 64 bit.

XaNThRaX - March 26, 2013, 2:19 pm

one question dose it require .net ?

Grizzpo - March 26, 2013, 2:22 pm

Yes, .Net Framework 2.0 as dependency.

Ivvan - March 26, 2013, 2:22 pm

You have -3 reputation. You joined February of this year. You only have 50 something posts and you randomly post a crypter and I don't know you. Yeaaaah, I really wan't to download this..

Grizzpo - March 26, 2013, 2:25 pm

If you would be able to check the About box you would now this is safe.

I'll post a screenshot of the about box later. The other maker isn't online now.

Nieeli - March 27, 2013, 3:14 am

I have helped him code this some time ago and there is no virus/rat/anything binded to it. (their wasn't when I was still working on it, but I doubt OP would infect someone).

Grizzpo - March 27, 2013, 4:02 am

Hi, thanks Nieeli, glad you could find some time to respond.

This should work on all windows from xp and above all versions due to all bit compatible runpe.
Dependency Framework 2.0

I need a few testers, you can PM me.

Server must be 127.0.0.1 and not to be spread for FUDness till uploading here. You ruin it for the rest else.

I'll explain what I need for the tests.

Before you respond:

The server.exe MUST be build on a x86 bit platform in Windows

lowkasen - *March 27, 2013, 4:40 am*

x32 bit wondows create server cannot???

thenewbigmack - *March 27, 2013, 6:27 am*
