Please be aware of, the builder does not work in any virtual environment, but the generated keylogger works in all windows environments, all virtual ones.

**sanili** - April 2, 2013, 9:26 am

Hi

Just installed auto Logger, It runs successfully and builds

It's not full FUD yet as Avira sees it as a TR/dropper.gen

I only selected Starup and Persistence

then Network, USB and worm spreader then built it.

After running to test om my system, My taskmng, msconfig, regedit has been disabled also, my skype crashed then I reinitialised it.

**thmaster100** - April 3, 2013, 3:55 am

@'sanili'

thank you for your review :p

good luck

**sander040400** - April 3, 2013, 11:10 am

Recoded StartUp method

Changed All HWID system

**sanili** - April 5, 2013, 1:16 pm

Just tested, Confirmed - 100% FUD

What I noticed is it infects the User, not the System - If you have multiple accounts on your system - you'll have to rerun on all instead of just one then it spreads

**ricsan** - April 5, 2013, 7:46 pm

is the usb / lan spreader still working features? thats what i like about this.

I'm thinking to buy/subscribe.

Please pm me.

**Ekoplex** - April 6, 2013, 1:54 am

Is there no guide helping you understand all the features?

**?Schock** - April 6, 2013, 2:08 am

does it hack runescape accounts(with bankpin)?

**Carbons** - April 6, 2013, 2:17 am

Quote:Just tested, Confirmed - 100% FUD

that's a good thing, since if you infect all users, it will require admin rights, and not all users are admins, besides that, it's almost always the current logged in user, that is the main user ;)

Please pm me.

It works fine

Quote:Is there no guide helping you understand all the features?  
not atm, but the options are very self ex-plenary.

Quote:does it hack runescape accounts(with bankpin)?  
there will most likely soon be added support for that

**Ekoplex** - April 6, 2013, 2:36 am

They aren't really self explanatory. When you buy a product you expect a guide. How does it spread via face book? How does the worm spreader work? It's all nice to see a million boxes to tick but do they actually work or is the dev just taking the piss?

**sanili** - April 6, 2013, 11:57 pm

uys

I'll buy AutoLogger anyday - Whats important on any product is the after sale.

The support JY gives for his products 100%.

**thmaster100** - April 7, 2013, 12:11 am
