Thread: [Licence / Auth System](#)

1n9i9c7om - March 28, 2013, 1:48 pm

Note: This isn't really secure. I did it when I just started learning things. If you really want to use it, make sure you know how to make it secure. Read more about this [here](#).

Hey,

I wanted to learn PHP and fresh up my VB skills because I didn't made something in VB for a long time.

So, here are some screenshots:

PHP Script ([Click to View](#))

It has no great design, but the design isn't that important because it's just the admin panel :)

Visual Basic ([Click to View](#))

Here is the ReadMe.txt (it's also included in the archiv):

ReadMe.txt ([Click to View](#)) Code 1. Upload the PHP Files to a webhost.

2. Import the database.sql - use PHPMyAdmin or whatever you want.

3. Change the settings in the settings.php (Database Settings & Login Settings)

4. Change the URL in the VB Project.

This should be everything.

Note: I made this to learn PHP. I don't say that it's perfect. I don't say that it's uncrackable.

But of course, you can use it for your tools or just to learn.

YOU ARE ALLOWED to remove the copyright. You don't have to give credits. You can change the code.

But please, don't give the source away without giving credits.

Oh, and I have one shoutout:

Thanks for 'Snorlax who told me that I forgot a comma :P

Every info you need is included in the ReadMe, have fun with this script.

Download: [Click me :\)](#)

Changelog:

Spoiler ([Click to View](#)) Code 13-04-2013 -> Fixed Delete a key. Fixed the key check. Display time instead of timestamps on getkeys.php

05-04-2013 -> "Delete a key"

02-04-2013 -> Fixed another SQLi and added the update check.

29-03-2013 -> Added AWM "Autobuy" and added a few mysql_escape_string's

28-03-2013 -> First release

~1n9i9c7om

H3x0S - March 28, 2013, 1:50 pm

You didn't post a download link. You should also mention something like [SOURCE] in the thread title.

1n9i9c7om - March 28, 2013, 1:52 pm

Oh, thanks, download link added & added [Source] to the title :)

'Snorlax - March 28, 2013, 1:52 pm

Very nice mate! It looks really good in my eyes!

Good luck to everyone who tries it out!

w?rloct - March 28, 2013, 1:53 pm

Looks very good! I'd love to be such good at PHP as you are :)

Cody8295 - March 28, 2013, 1:59 pm

Looks pretty neat, incorporate an IPN system and it would be awesome. Also, make sure there are no vulnerabilities such as SQLi or cracking faults.

Danny - March 28, 2013, 4:35 pm

Looks pretty nice I will take a look into it thanks

1n9i9c7om - March 28, 2013, 5:03 pm

I made a mistake in the AWM Postback script, please don't use it for now because the people wouldn't get anything for it, sorry :/

Dgod123 - March 28, 2013, 5:05 pm

This is pretty awesome dude. Thanks :)

ProfitCoder - March 28, 2013, 6:07 pm

Looks Nice ;)

Im going to download it right now,

Thank for the share

log dot zip - March 28, 2013, 6:09 pm

Make sure there are no XSS's or SQLi. I'll have a look at the source now.

NotYourNormalApproach - March 28, 2013, 6:15 pm

Simple and clean, thanks for it. Going to take a look on the source later on.

Keep up the good work.

StyxWorld - March 29, 2013, 3:34 am

Vouch, nice tool. Works great! ?

1n9i9c7om - March 29, 2013, 4:01 am

Updated it. AWM Autobuy should work now, I explained how to set it up in the "AWM IPN.txt" inside the .rar archiv :)

I also added a few mysql_escape_string's c:

CoderEX - March 29, 2013, 5:22 pm

Is anyone else having a problem? I keep getting "Unknown Error."

1n9i9c7om - March 30, 2013, 2:36 am

Do you get it when you are trying to login or to register a key?

CoderEX - March 30, 2013, 7:14 am

(Mar 30, 2013 02:36 AM)1n9i9c7om ? Wrote: [\[CITE\]](#) Do you get it when you are trying to login or to register a key?

I get the error while trying to Login and Register.

1n9i9c7om - March 30, 2013, 11:52 am

(Mar 30, 2013 07:14 AM)AustinCoder Wrote: [\[CITE\]](#) I get the error while trying to Login and Register. I PM'd you about it, I hope we can get it working for you ?

ARGOS-SOFT - March 30, 2013, 12:00 pm

I will try this out :) Thanks for the share.

1n9i9c7om - April 2, 2013, 7:57 am

Update:

Added an Update Check

Fixed another SQLi :/

xTechnologyYx - April 2, 2013, 8:39 am

Thanks :)

Im using this in my tools and its awesoem :D

Bloodz_Ninja - April 4, 2013, 7:06 pm

thanks man, well done, love it :D but please explain ipn and awm a bit to me?

1n9i9c7om - April 5, 2013, 5:46 am

Of course ;)

AWM is a CPA network. You'll get money if people complete surveys to get your product.

IPN means "Instant payment notification", so the script will know when somebody completed a survey. So the licence for a user is working instantly after he completed a survey ;)

I also added the feature to delete a key completely. Somebody in another forum requested it. :)

Bloodz_Ninja - April 5, 2013, 7:07 am

i have suggestion, like add liberty reserve as payment for buyers and when purchase is made they get they key automatic?

Qmz_ - April 5, 2013, 3:08 pm

That looks actually pretty good! Willing to use this on my next projects. Great job.

RumbleBee - April 6, 2013, 11:45 am

Hey,

thank you for my suggestions got added, but the dl isnt working :(

Also I get some errors in the old update.php

Quote:Warning: file_get_contents() [function.file-get-contents]: http:// wrapper is disabled in the server configuration by allow_url_fopen=0 in HOSTHERE/hwidcheck/web/update.php on line 5

Warning: file_get_contents(<http://pastebin.com/raw.php?i=7751jiPA>) [function.file-get-contents]: failed to open stream: no suitable wrapper could be found in HOSTHERE/hwidcheck/web/update.php on line 5

Warning: file_get_contents() [function.file-get-contents]: http:// wrapper is disabled in the server configuration by allow_url_fopen=0 in HOSTHERE/hwidcheck/web/update.php on line 6

xWomanizer - April 7, 2013, 2:10 am

(Mar 30, 2013 11:52 AM)1n9i9c7om ? Wrote: [\[CITE\]](#) I PM'd you about it, I hope we can get it working for you ?

I get this error as well.

Also: when I try to manage my keys it gives me this error:

Code Parse error: syntax error, unexpected \$end in /home/bla bla bla/public_html/login/getkeys.php on line 64

Thanks for the hand! :)

ManDoR - April 7, 2013, 2:29 am

Stop using mysql_* functions as they are not secure enough and as they are deprecated.

Use PDO instead. If you need any help on how to use PDO the php section is here to help you :)

sSenSi - April 7, 2013, 3:41 am

Nice project, this will help me

35 char

Oscura - April 7, 2013, 8:06 am

Looks really good! And quality > design in my opinion

OneTXxL - April 9, 2013, 5:00 am

[img]<http://grabilla.com/03409-99bda062-b3ba-4a29-86fd-f3e1a6671b1c.png>[/img]

Firstly thank you for sharing excellent but nevertheless

the delete button does not work, yet I tried but I can not, someone would have it the solution please thank you in advance

1n9i9c7om - April 9, 2013, 6:01 am

Will take a look at it this weekend, don't have much time at the moment. The Error on line 64 was a
hotfix :D

xWomanizer - April 10, 2013, 7:44 am

Great! The error is fixed now, works perfectly now!

Now when I try to use it with visual basic this is what I get once I debug my project:

Code An error occurred creating the form. See Exception.InnerException for details. The error is:
The remote server returned an error: (401) Unauthorized.

IYS-Security - April 10, 2013, 11:12 am

when im trying to add MOTD

Fatal error: Call to undefined function mysql_escape_string() in /home/***/public_html/***/motd.php
on line 22

RumbleBee - April 10, 2013, 11:39 am

Added you in Skype for some help with the AWM Autobuy :p

ovac - April 10, 2013, 4:32 pm

Good stuff, the error is fixed and it's working great.

Good work.

1n9i9c7om - April 10, 2013, 10:01 pm

(Apr 10, 2013 11:12 AM)IYS-Security Wrote: [\[CITE\]](#) when im trying to add MOTD
Fatal error: Call to undefined function mysql_escape_string() in /home/***/public_html/***/motd.php
on line 22

Whops! Open the motd.php and change "mysql_escape_string" to "mysql_escape_string".
Will fix it later, I have school in an hour :/

(Apr 10, 2013 07:44 AM)xWomanizer Wrote: [\[CITE\]](#) Great! The error is fixed now, works perfectly now!

Do you get a login prompt from your browser (not the one from the script :P) when trying to open the files in your browser?

IYS-Security - April 11, 2013, 10:28 am

nice man look what i did for login :) + anti injection <http://itsyourhost.net/prog2/anti.php>

<http://itsyourhost.net/prog2/login.php?login=true>

nice system very thanksfull

[\[IMG\]http://img707.imageshack.us/img707/458/capturebfk.png\[/IMG\]](http://img707.imageshack.us/img707/458/capturebfk.png)

there is a problem man you said valid for 1 hour i did a test but after X time the serial number dont delete it self or bann it self

[\[IMG\]http://img191.imageshack.us/img191/4142/captureaak.png\[/IMG\]](http://img191.imageshack.us/img191/4142/captureaak.png)

Uploaded with ImageShack.us

just help me man after 1 hour like you see 3600 secound dint close or somthing or deleted why ??

Demure - April 12, 2013, 12:19 pm

You should make the valid till be a real date instead of the numbers.

ManDoR - April 12, 2013, 12:23 pm

I like how you just don't a give a shit about the advice I gave above.

1n9i9c7om - April 12, 2013, 6:07 pm

(Apr 11, 2013 10:28 AM)IYS-Security Wrote: [\[CITE\]](#) <snip>

Because it will delete nothing. It just check on every start if it's valid or not. Should change it in the script too, will try tomorrow. It's late here, don't want to do any mistakes ?

(Apr 12, 2013 12:19 PM)NightWalker Wrote: [\[CITE\]](#) You should make the valid till be a real date instead of the numbers.

Yep. Like I said, will do it later.

(Apr 12, 2013 12:23 PM)ManDoR Wrote: [\[CITE\]](#) I like how you just don't a give a shit about the advice I gave above.

I read it, I just don't replied. Will change to PDO or MySQLi soon, but I think PDO would be better

too ;)

I released an important update.

There was an error with keys which are not valid anymore, it's fixed now.
I also fixed the "Delete Key isn't working" error.

And, last but not least, I made this:

Dates instead of Timestamps ([Click to View](#))

Next update will work with MySQLi or PDO.

IYS-Security - April 13, 2013, 5:24 am

dint fixed you just added this line but in vb.net if serial is Not valid and its out of date its just login with out erros

[IMG]<http://img28.imageshack.us/img28/2762/captureuak.png>[IMG]

Uploaded with [ImageShack.us](#)

1n9i9c7om - April 13, 2013, 5:37 am

That's how it should look like:

Did you tried to change something on the PHP Script/VB Tool?

IYS-Security - April 13, 2013, 5:54 am

please answer my PM having problems

1n9i9c7om - April 13, 2013, 6:33 am

Answered :)

I'm so stupid, I forgot to update the check.php in the .rar archive...

Updated now!

heyheyptp - April 13, 2013, 8:09 am

thanks nice share bro
compzzz heyheyptp

Anti - April 13, 2013, 8:15 am

Looks pretty good, but you should work on the Panel design.

1n9i9c7om - April 13, 2013, 9:06 am

Yep I know that the design isn't good, but I'm not good at HTML. :/

Anti - April 13, 2013, 10:23 am

Just get a simple little template and edit it out.

xWomanizer - April 13, 2013, 10:59 am

Why even care about the design? Its a admin panel for sake :P

NipaT - April 13, 2013, 11:03 am

Oh ! Verry nice boy , but a design is not beautiful

1n9i9c7om - April 13, 2013, 12:00 pm

(Apr 13, 2013 10:59 AM)xWomanizer Wrote: [\[CITE\]](#) Why even care about the design? Its a admin panel for sake :P

But I want to add a member area soon too, so it'd be better if this doesn't look ugly ;)

Thanks to [IYS-Security](#) for the idea :)

RumbleBee - April 13, 2013, 12:45 pm

Add me I skype and help me with AWM and I will work on the design :)

If you accept this 'trade' I pm you my name.

xWomanizer - April 14, 2013, 2:41 am

(Apr 13, 2013 12:00 PM)1n9i9c7om ? Wrote: [\[CITE\]](#) But I want to add a member area soon too, so it'd be better if this doesn't look ugly ;)

Thanks to [IYS-Security](#) for the idea :)

Oh In that case, I guess you could brighten up the design a bit.

Blue Eyes - April 14, 2013, 4:32 pm

Hello, here I looked more ready because I tried just one licensing system as him,

What I'm on Manage Keys I have a PHP ERROR.

I have nothing Modify the code by "settings.php"

here is a sreen for mieu and see what my problem.

[\[IMG\]http://img23.imageshack.us/img23/6774/testehqh.jpg\[IMG\]](http://img23.imageshack.us/img23/6774/testehqh.jpg)

I'm French I use Google translation.

IYS-Security - April 15, 2013, 6:14 am

maybe your webhosting have limited your account

1n9i9c7om - April 15, 2013, 11:53 am

There is no reason to disable getTimestamp(), is there?

But is it working for everyone else?

Will work on it again at the weekend, don't have much time the next two weeks.

Blue Eyes - April 15, 2013, 12:44 pm

I found the problem of why

000 at webhost not work

but I hostinger.com replaced by SPAM.

cella and works great no problem thank you very much ^^.

IYS-Security - April 16, 2013, 5:03 am

i told you its from webhost

jai ta dit c de la webhost problem

NeuesJahr - December 10, 2013, 11:46 am

I cant Open the Licence System in (VB) Thats says:

The Application has been Update use this.... -.-

Prime - December 10, 2013, 11:58 am

Thanks a lot, this could be very usefull!

SIM-1456245 - December 10, 2013, 12:43 pm

Congrats people, a very nice gravedig. Come one, just check the date. But whatever. If it is grave diged, then, @OP very nice. Simple and effective.

Hexology - December 10, 2013, 10:12 pm

...

If it's useful to people then why not leave a post?

AirCode - December 10, 2013, 11:41 pm

Oh my god this is incredibly insecure. All you have to do is set a network breakpoint on any requests usekey.php and change the response to "c3ee6593d86ba4aec897953b6d811e12" - Tada you're in... Please add real encryption / tamper detection techniques.

Leroy Jethro Gibbs - December 11, 2013, 12:02 am

Also, the MOTD.php file has a typo on line 22. It says strint instead of string.

1n9i9c7om - December 11, 2013, 5:36 am

(Dec 11, 2013 12:41 AM)AirCode Wrote: [\[CITE\]](#) Oh my god this is incredibly insecure. Please add real encryption / tamper detection techniques.

I know - this is old and insecure, I did it when I just learned ?

It'd also be easier to just change the response from check.php to "e8af1602eb4fdbe1e2820b1df772cc13", as a valid response from usekey.php won't directly let you in. ?

I'm aware that this is insecure, maybe I'm going to update this, not sure yet. However, I'll add that it's insecure to the OP.

//Edit: Oh well, the PHP source even uses mysql_* functions. BLAME ON ME.

?Eatos - December 11, 2013, 5:41 am

(Dec 11, 2013 06:36 AM)1n9i9c7om Wrote: [\[CITE\]](#) I know - this is old and insecure, I did it when I just learned ?

You should definitely update it! I would like to see the final result...

Hexology - December 11, 2013, 3:37 pm

Same, I'd love to see this get updated & more secure.

?unner - December 11, 2013, 7:49 pm

You might want to change the webclient from it current state and add this

Code Now

Dim WC As New WebClient

After

Dim WC As New WebClient With {.Proxy = Nothing}

This will make it more safe.

tweety - December 11, 2013, 7:55 pm

(Dec 11, 2013 08:49 PM)?unner Wrote: [\[CITE\]](#) You might want to change the webclient from it current state and add this

Code Now

Dim WC As New WebClient

After

Dim WC As New WebClient With {.Proxy = Nothing}

This will make it more safe.

WebClient class implements IDisposable, so why not use them?

PHP Code

```
<?php
```

```
using (WebClient wc= new WebClient())
```

```
{
```

```
//do stuff
```

```
}
```

Doctor07 - December 12, 2013, 8:33 am

Looks pretty basic but definitely something that people can work from! Nice post.
