Okey so you are actually telling me when you are sending test installs all of them get executed but with your so called loads i only get 2-3% I have used this very server many times before WITHOUT any problem. Or well it got botkilled after 3 days but i had really good execution rate. Thats why i bought loads for 700\$ And i get nothing back and you are saying my server sucks mkay. Scam scam scam

As our thread says. We are only sending once. And there are lots of factors. Dependencies, Execution rates, stability, your program/botnet, timezone, startup, and more..

Qmz_ - May 3, 2013, 6:29 am

Even if at first was little delivery problem, I got my bots. I'd recommend this service for everyone. :)

Edit: Bought yesterday 500 loads, got 350. Today I checked again and there was only 40 left and I had startup. Can't figure out the reason. It's probably of my settings, or then of the botshop. I don't know. But for me, \$0,75 per bot is kinda expensive.
