Captain Deadpool - March 29, 2013, 4:35 pm

What does it mean by string??? Ive been trying to decode for about 30-40 minutes now

IceOnFire - March 29, 2013, 4:37 pm

Never heard of Reversion either. "String"? What kind of string?

know reversion is just it reversed, I think. But still, "string" makes no sense!

Twitchydude - March 29, 2013, 4:42 pm

so if im doing it right i get 4143 on the md5 decode??

IceOnFire - March 29, 2013, 4:44 pm

Try this password: 1100110 0010110 1000110 0010110

Man come on, you got password right in front of your eyes. Just decode it.

Parkwaaay - March 29, 2013, 6:23 pm

Not sure on the [Hex] part of the decryption? can these all be found on crypto? i typed in hex decode and it came up with hexadecimal decoder and i put the md5 hash in and got a bunch of symbols.
Can anyone help?

EDIT: Nevermind, i got it. Thankyou for the crypter :)

The Flying Dutchman - March 29, 2013, 7:11 pm

I cant manage to get past the HEX -> string

Edit. Nvm got , tnx :)

LittleBobbyTables - March 29, 2013, 7:45 pm

Thanks for this man, appreciate it.

serpiccio - March 29, 2013, 7:47 pm

If for instance your hex code looks like this 616263 either your string is "616263" or "abc".

That' s because each couple of hex ciphers equals 1 byte and 1 byte equals 1 char but String could also mean to take the hex number and treat it as a string.

Cyahickk9 - March 29, 2013, 9:30 pm

Hiya, I'm having a bit of trouble decrypting the code. I'm actually trying...Googling terms that I really shouldn't even be Googling. I REALLY want to know how to decrypt this, but it seems really easy. Could someone just help me via Teamviewer? I'd appreciate it. Thanks.

SIM-1734772 - March 29, 2013, 9:32 pm

Thats the point - people who havent got experience should not have this for free. Thats why password is "crypted".

At least it will be almost FUD for longer :) The only thing that is not working is binder :(You can't actually drag and drop.

CyberneticTitan - March 29, 2013, 9:56 pm

Thangorn - March 30, 2013, 8:30 am

Soo many idiots, if you can't decode it, then just walk away you shouldn't even be in this section. Read a tutorial, there are plenty in these forums about how to decrypt something.

People scanning on VT that's why this is detected so quickly.

Ns711 - April 10, 2013, 6:12 pm

Little help here? The exe I was trying to crypt is Nirsofts WirelessKeyView. It crypts OK and is UD after crypting. BUT before the process it could be run from the command line (or a bat file) and would run in the background and produce an output file. After Crypting, trying to run the exe from a command line just opens the app and produces no output.

Bottom line it needs to be UD and run in the background. Any idea why crypting would mess this up?

Also, I'm using the public stub cuz the exe needs to be UD not totally FUD (at least its not critical) plus this is a one time (hopefully short-lived) event.

anybody whats pass

guyeeee - April 26, 2013, 4:36 am
its not fud. its like 15/36 or 12/20

JustLoosenUpBro - April 26, 2013, 2:27 pm
The Password For The Crypter Is "CA" PS Your Welcome

zelvic2059 - April 26, 2013, 10:16 pm
It says.. no files to extract.
did i do something wrong?

RedRubies - April 27, 2013, 6:09 am
Not FUD but still good for a free crypter!

Anonymisused - April 28, 2013, 11:47 am
Am I insane or just doing something wrong? I've updated the stub to your April 4th update, yet when I crypt my file the finished exe won't run.. Something about not being setup correctly for .NET framework. What am I doing wrong? It seems like this happens with every free crypter. If anyone knows, could you quote me?

rasvi24 - April 29, 2013, 12:54 am
wow "CA" works gr8.. thank u LOOSENUPBRO
but my darkcomet server file is not working when crypted :(
the unencrypted fresh servers only working anygood fuds??

TheDarkComet - May 1, 2013, 5:07 am
Some skids uploaded it on virustotal, not even UD anymore
Scanned it and heres the results:

Scanner results : 38% Scanner(s) (14/37) found malware!
Time : 2013/05/01 14:23:47 (CEST)

poepen112 - May 8, 2013, 5:19 pm
Wtf is this? I can't delete the map Stub, i opened in sandboxie and it shows mcsacore.exe, rundll32.exe, rundll32.exe, rundll32.exe, is this shit infected or something?
HOW DO I REMOVE THIS FUCKING RAT? HELP ME PLEASE? PM ME...

Liwlen - June 27, 2013, 1:59 pm
PASSWORD IS: CA

WELL I NEED TO TYPE ATLEAST 35 CHARS :(

DanteStigma - June 28, 2013, 1:53 am
Liwlen, it's outdated why do you need this old stub with crypter? probably already detected :/

anonymoosehax - June 28, 2013, 3:43 am

doesn't work that great.
needs to be updated also.

[Aegis Crypter OFFICIAL WEBSITE](#)

The private stub gets updated every 1-2 day, and the public, just VERY RARELY. And the public is FUD only for 12 hour, after 12 hour, 5-12 AV will find it :S ppl just F@\$@£ put on virustotal and other sites, what are these people's problem can't understand :S

itsmemario62 - June 28, 2013, 6:44 am

This crypter is not fud. Maybe so much people scan it on virustotal ?

it was detected : 15/26 , for the most popular AV like.. Avast, Bit Defender , mcafee, microsoft

Don't waste your time to decrypt the password, the crypter is too old now.

Maybe the private version is better 0/34 ?

HINDEK - June 29, 2013, 10:16 am

je peux pas ouvrir le stub quelle est le mot de passe ? please donner moi le mot de passe

Stellar - June 29, 2013, 2:32 pm

I got the PASS :) If you clicked to go onto the YT a guy used bruteforce to get it or something.

Pass is: CA

#Sub7 - June 29, 2013, 2:39 pm

Write only in english here, thanks :)

Joe? - June 30, 2013, 2:20 pm

detected 12/26. on all the popular av's that everyone uses. the ones that didn't detect it aren't used anyway. until stub is updated don't bother :)

Extremis - July 1, 2013, 5:33 am

Thanks really great crypter I love it!

ronaktoshniwal94 - July 1, 2013, 6:04 am

how to decode HEX and STRING? ***characters*

http://chk4me.com/check/public/IS2jLmr9_5uqG7U5e60k0d7o9wl0566M

that's sad it needs to be fud again

niketan237 - September 17, 2013, 2:30 am

This crypter is not working fine with cybergate...but on website it's showing it's working with cybergate too...

Its just working with only DC only...but there are so many faults in DC.

Overall i dont like this crypter

vaan - September 17, 2013, 2:54 am

WHAT IS STRING? AND REVERSION? STUCK HERE

thanks but for use stub pasword requier

tahareal - November 18, 2013, 12:48 pm

thank you so much mate :D ^^ :D

Rayyan - March 2, 2014, 9:25 am

beware guyz his crypter is not crypting eof stuff

matt22420 - March 2, 2014, 12:01 pm

cool does it work ?????

Beznadzieja - March 2, 2014, 12:37 pm

Nice crypter. Is it still fud?

Please reply ;)

Please reply ;)This was fud like a year ago.

I think 6.0 is out now but im pretty sure its all paid lol....

emma00745 - March 12, 2014, 7:24 am

can someone update on this crypter now... is it still FUD???

l????? - March 12, 2014, 2:38 pm

Didn't work very well... 33/49 when I scanned it...

cybergate0 - March 15, 2014, 6:17 am

your stub is not FUD anymore, please post the new updated link.

PurpleMonkey - March 16, 2014, 6:35 am

Great Crypter, not FUD no more though ./ Thanks for realising it though :)

r4ju - March 17, 2014, 3:13 am

pm me for the password. please i need one thank you.

Krypto. - March 17, 2014, 4:19 am

Guys.. the password is "CA"

When you reverse its "AC"

When you put that in hex its "4143"

When you md5 that you get "6195f47dcff14b8f242aa333cdb2703e"

When you base64 that you get "NjE5NWY0N2RjZmYxNGI4Zjl0MmFhMzMzY2RiMjcwM2U"

This is All/50 so its not worth keeping it a secret anymore

Strategy911 - *March 17, 2014, 8:27 am*

This thread is a year old why is everyone in here lol

EditedInsanity - *March 25, 2014, 3:44 pm*

Password Is CA its took me a while to decode
