Carbons - March 30, 2013, 12:04 am

This method stays FUD for a really long time, I can tell you guys.

Huge vouches for BoomShotKapow ?

LiveModz - March 30, 2013, 12:14 am

Nice service you got here, good luck :)

ThinkThinkorThink - March 30, 2013, 12:16 am

His crypts are very good, I would recommend anyone his services! I got the vouch copy and I am very satisfied.

BoomShot - March 30, 2013, 12:24 am

Went ahead and did another scan to verify everything, it's still 100% FUD and it'll stay like that.

This encryption method is unlike anything you'll ever see, it has a hidden startup method and bypasses scantime and runtime.

#Skyline - March 30, 2013, 12:52 am

Vouch for boom.

He crypted my file and it was 0/37

Thank you.

The Black Knight - March 30, 2013, 7:40 am

Vouch for BoomShotKapow, FUD and legit ???

BoomShot - March 30, 2013, 4:55 pm

Glad to hear everyone is loving the service.

It's well worth the 3 dollars and the encryption method is hardcore, I can ensure that.

xJPM - March 30, 2013, 5:06 pm

By FAR the best crypting service on HF. I've gone through a few people in the past couple days and nobody was nearly as helpful as Boomshotkapow.

Very friendly and communicative. Couldnt have asked for a better service.

A++

I vouch for this user! Great service! Fast and reliable! 0/35 FUD! Thanks again! Good luck with sales.

How long does it usually stay FUD for?

BoomShot - March 30, 2013, 7:30 pm

(Mar 30, 2013 06:56 PM)URANIUM Wrote: [\[CITE\]](#) How long does it usually stay FUD for?

I cannot give you a time as it has been FUD since it was created.

It's very advanced, I doubt this thing will be detected anytime soon.

The best part is if it's even detected, every file is unique, so the next one will be FUD.

Not even a general range? 1 week? 1 month? Looks like a great product, but to compare to other crypters this information should be 'generally' known.

It's hard to give you a time frame when this thing hasn't been detected since the creation.

I would say that it'll stay FUD for a month plus and that's an understatement.

I will not charge you for something that would be otherwise falsely advertised.

For one, this is not associated with FileProtector.

Two, it's not backdoored especially when the people are buying an encryption, not a crypter.
