There are new ways of earning being added all the time and if you spend around 5-20 minutes per day earning coins and points you can make \$50-\$100 in Paypal cash a week!

These are great things to do while on the train commuting, or when you sit down for a break at work!

You can cash out to Paypal with a minimum of \$1 payouts.

I can most def. vouch for this method, worked for about 5 minutes, and made a dollar, just watching videos and download apps, running then deleting them. Not much, but still, a dollar I never had.

How can I cash out the points via Paypal? May you guys elaborate on that please? Thank you in advance.

emptyqwerty - April 8, 2013, 3:54 pm

Just tried it out. It's not nearly as effective as it might seem. Each item scanned offers ~ 10 coins. With only about 5 items at stores nearby, it isn't worth it.

Goldrush - April 8, 2013, 7:28 pm

Any tips on how to earn heaps of points?.
